Simplified Chinese translation of Thing Explainer: Complicated Stuff in Simple Words by Randall Munroe.

The Universe of Reality questions many answers and answers many questions. There are many scientific and political deceptions forwarded to the general public, especially Americans. We have been deceived for hundreds of years. The comments and theories presented in this writing untangle and decipher the phenomena of light, gravity, the four forces, and many political deceptions. The Universe of Reality (UOE) theories are much closer to the truth than the wild, problematic conjectures scientist and politicians present as facts. About 90% of "accepted" theories are wrong, and some just straight lies, 9% twisted truths, and 1% arguable. The UOE theories combine the four forces (strong, weak, electromagnetic, and gravity) into one force, the universe of energy. These theories challenge older, accepted theories and conjectures by well known scientists such as Albert Einstein and Isaac Newton, yet the UOE theories are built on the older theories of well known scientists.
