The Oxford Handbook of Jurisdiction in International Law provides an authoritative and comprehensive analysis of the concept of jurisdiction in international law. Jurisdiction plays a fundamental role in international law, limiting the exercise of legal authority over international legal subjects. But despite its importance, the concept has remained, until now, underdeveloped. Discussions of jurisdiction in international law regularly refer to classic heads of jurisdiction based on territoriality or nationality, or use the *SS Lotus* decision of the Permanent Court of International Justice as a starting point. However, traditional understandings of jurisdiction are facing new challenges. Globalization has increased the need for jurisdiction to be applied extraterritorially, non-State forms of law provide new theoretical challenges and intersections between different forms of jurisdiction have become more intricate. This Handbook provides a necessary re-examination of the concept of jurisdiction in international law through a thematic analysis of its history, its contemporary application, and how it needs to adapt to encompass future developments in international law. It examines some of the most contentious elements of jurisdiction by considering how the concept is being applied in specific substantive and institutional settings. This collection of articles critically examines legal subjectivity and ideas of citizenship inherent in legal thought. The chapters offer a novel perspective on current debates in this area by exploring the connections between public and political issues as they intersect with more intimate sets of relations and private identities. Covering issues as diverse as autonomy, vulnerability and care, family and work, immigration control, the institution of speech, and the electorate and the right to vote, they provide a broader canvas upon which to comprehend more complex notions of citizenship, personhood, identity and belonging in law, in their various ramifications.

Socio-economic inequality is deeply rooted in Zimbabwe due to a number of factors. One of the main factors is the exclusion of socio-economic rights as justiciable under the now repealed Lancaster House Constitution (LHC). A plethora of excessive bureaucratic actions in a number of instances left many people stranded without the recourse to the law, particularly without protection by

the Constitution. To correct this historic anomaly, the 2013 Constitution was enacted. The 2013 Constitution protects both civil and political rights and socio-economic rights in the same way as justiciable rights. This provides the highest degree of interdependence and interrelatedness of all rights in the domestic legal order. In order to ensure that socio-economic rights are effectively protected and enforced, this study identifies and discusses the framework for protecting socio-economic rights under the 2013 Constitution. Firstly, the specific rights protected under the Constitution and the obligations imposed by these rights are presented. Secondly, the role of the courts in the protection of socio-economic rights is discussed. Further, some of the major conceptual and practical challenges that are likely to arise in the adjudication of socio-economic rights are identified. In this regard, the study attempts to present solutions meant to overcome the conceptual and practical challenges that are faced in the enforcement of socio-economic rights. Furthermore, this study argues that strictly adopting one of the two models of review, namely either the reasonableness approach as adopted by South African courts or the minimum core approach as expounded by the United Nations Committee on Economic Social and Cultural Rights (CESCR), will inhibit the proper enforcement of the protected rights. Therefore, courts should consider adopting an integrated model that includes both approaches to ensure that socio-economic rights are effectively protected and realised.

EU commitment to human rights policies has grown following the Lisbon Treaty. Taking stock of those developments, this book describes the framework, actors, policies, and strategies of human rights across the EU and how their impact is felt. Contributed to by scholars from across the EU, this provides an in-depth and holistic view of the issues.

Arts Council England plays a vital role in safeguarding, consolidating and building the nation's cultural infrastructure and enhancing its quality of life. It supports a range of activities across the arts, museums and libraries. Support for the arts comes principally through the distribution of public money, either grant in aid from the tax payer or proceeds from National Lottery ticket sales. Since 2010, the Arts Council has seen its grant in aid fall by a third, a situation that has prompted cuts in staff numbers and difficult decisions about where to target support. While it is essential to acknowledge the prevailing economic climate, the Committee would be disappointed if the Arts Council saw any further fall in its grant in aid. There remains a clear funding imbalance in favour of London at the expense of tax payers and lottery players in other parts of the country. The Arts Council is well-placed to restore some balance. Also the Arts Council needs to redouble its already significant efforts at brokering cultural partnerships involving businesses, local authorities, local enterprise partnerships, universities and international organisations, particularly within the EU, which might provide additional funding sources.

European public discourse often frames (forced) migration solely as a security issue and ignores the implications of societal diversity for health, quality-of-life and well-being, in both Africa and Europe. The present volume offers an interdisciplinary and international look at the relationship between refugees, diversity, and health, including

health care policies, socio-political framework conditions, environmental factors, the situation in refugee camps, quality-of-life approaches and economical perspectives. Intellectual property (IP) rights impact innovation in diverse ways. This book critically analyses whether additional rights beyond patents, trademarks and copyrights are needed to promote innovation. Featuring contributions from thought-leaders in the field of IP, this book examines the check and balances that already exist in the IP system to safeguard innovation and questions to what extent existing IP regimes are capable of catering to new paradigms of innovation and creativity.

Why did Albania enjoy some of the most successful anti-corruption programs and institutions along with what appeared to be growing levels of corruption during the period 1998-2005? Looking at corruption through a post-structuralist discourse analysis perspective this book argues that the dominant corruption discourse in Albania served primarily to institute the neoliberal order rather than eliminate corruption. It did so in four interrelated ways. First, blaming every Albanian failure on corruption avoided a critical engagement with the existing neoliberal developmental model. Second, the dominant articulation of corruption as abuse of public office for private gain consigned it to the public sector, transforming neoliberal policies of privatisation and expanding markets into anticorruption measures. Third, international anticorruption campaigns reproduced an asymmetric relationship of dependency between Albania and the international institutions that monitored it by articulating corruption as internal to the Albanian condition. Finally, against corruption international and local actors could articulate a neoliberal order that was free of internal contradictions and fully compatible with democratization. As a rare example of post-structuralist discourse analysis of corruption this book can be useful for future research on discourses of corruption in other countries of the region and beyond.

This annual report prepared by The Board provides a comprehensive account of the global drug situation, analyses trends in drug abuse and drug trafficking and suggests necessary remedial action. Divided into four parts, it covers the following topics: drugs and corruption, functioning of the international drug control system, analysis of the world situation and finally, a set of recommendations to Governments, the United Nations and other relevant international and regional organizations. A set of Annexes follows as well.

The discussion of the norm of the rule of law has broken out of the confines of jurisprudence and is of growing interest to many non-legal researchers. A range of issues are explored in this volume that will help non-specialists with an interest in the rule of law develop a nuanced understanding of its character and political implications. It is explicitly aimed at those who know the rule of law is important and while having little legal background, would like to know more about the norm.

This book explores various approaches around the world regarding price term control, and particularly discusses the effectiveness of two major paths: ex ante regulatory and ex post judicial intervention. Price control and its limits are issues that affect all liberal market economies, as well as more regulated markets. For the past several years, courts in many different countries have been confronted with the issue of whether, and to what extent, they should intervene regarding price-related terms in standard form contracts – especially in the area of consumer contracts. Open price clauses, flat remunerations, price adjustment clauses, clauses giving the seller/supplier the right to

ask for additional payments, bundling or partitioning practices, etc.: a variety of price related terms are used to manipulate customers' choices, often also by exploiting their behavioral biases. The result is an unfavorable contract that is later challenged in court. However, invalidating a given price term in standard forms e.g. of a banking or utilities contract only has an inter partes effect, which means that in thousands if not millions of similar contracts, the same clauses continue to be used. Effective procedural rules are often lacking. Therefore, pricing patterns that serve to hide rather than to reveal the real cost of goods and services require special attention on the part of regulators. The aim of this book is to determine the various approaches in the world regarding price term control, and particularly to discuss the efficiency of both paths, ex ante regulatory and ex post judicial intervention. Thanks to its broad comparative analysis, this book offers a thorough overview of the methods employed in several countries. It gathers twenty-eight contributions from national rapporteurs and one supra-national rapporteur (EU) to the 2018 IACL Congress held in Fukuoka. These are supplemented by a general report presented at the same IACL Congress, which includes a comparative analysis of the national and supranational reports. The national contributors hail from around the globe, including Africa (1), Asia (5), Europe (17), the European Union (1) and the Americas (5).

Genre theory has focused primarily on the analysis of generic constructs, with increasing

attention to and emphasis on the contexts in which such genres are produced, interpreted, and used to achieve objectives, often giving the impression as if producing genres is an end in itself, rather than a means to an end. The result of this focus is that there has been very little attention paid to the ultimate outcomes of these genre-based discursive activities, which are more appropriately viewed as academic, institutional, organizational, and professional actions and practices, which are invariably non-discursive, though often achieved through discursive means. It was this objective in mind that the book develops an approach to a more critical and deeper understanding of interdiscursive professional voices and actions. Critical Genre Analysis as a theory of discursive performance is thus an attempt to be as objective as possible, rigorous in analytical endeavour, using a multiperspective and multidimensional methodological framework taking into account interdiscursive aspects of genre construction to make it increasingly explanatory to demystify discursive performance in a range of professional contexts.

A timely intervention as higher education in India begins to pay equal importance to Quality, alongside Access and Equity. Indian higher education is the third largest in the world. It is undergoing unprecedented expansion and reforms. Yet, no Indian university figures among the World's Top 100! The problem lies primarily with the quality of higher education. This book serves as a quality management guide for the heads of colleges and universities, focusing on issues, techniques and improvement at the institutional level. In building up a sound framework, it effectively combines generic methods and techniques with specific mechanisms of quality assurance for in-campus activities such as curriculum planning, teaching learning processes, human resource management, infrastructure management and information and communication technologies. The author's expertise as a management scientist, trainer of heads of higher education institutes and experience of institution building gives the book an extra edge.

In times of rapid change and unpredictability the European Union's role in the world is sorely tested. How successfully the EU meets challenges such as war, terrorism and climate change, and how effectively the Union taps into opportunities like mobility and technological progress depends to a great extent on the ability of the EU's institutions and member states to adopt and implement a comprehensive and integrated approach to external action. This Research Handbook examines the law, policy and practice of the EU's Common Foreign and Security Policy, including the Common Security and Defence, and gauges its interactions with the other external policies of the Union (including trade, development, energy), as well as the evolving political and economic challenges that face the European Union.

In this report the Treasury Committee makes recommendations on pensions, savings, HMRC debt recovery powers and housing. The greater flexibility and choice provided by the proposed pension reforms is welcomed. The 'guidance guarantee' is an important part of making sure that consumers benefit from increased choice. It should be measured against a set of recommended principles to ensure its effectiveness. The pensions reforms are also likely to lead to financial innovation. Following the financial crisis, and the mis-selling scandals, the reputation of the industry is under scrutiny. With regard to savings - double taxation has long been a deterrent to some forms of saving. With the enhanced flexibility for those saving there may now be scope in the long term for bringing the tax treatment of savings and pensions together to create a 'single savings' vehicle. The proposal to grant the power to HMRC to take money directly from people's bank accounts is extremely concerning. Exceptional powers such as this require prior independent oversight. With regard to housing, the Help to Buy scheme, at least in the short-to-medium term, could raise house prices. There is also the risk that withdrawal of Help to Buy may have a distorting effect on the housing market. The need

to address these difficulties places a particular responsibility on the FPC, as well as the Government, for detecting and addressing the financial stability risks arising from the housing market. There are also reservations about any extension of retrospection in the tax system. Retrospection should be considered only in wholly exceptional circumstances

This insightful book investigates the historical, political, and legal foundations of the Chinese perspectives on the rule of law and the international rule of law. Building upon an understanding of the rule of law as an 'essentially contested concept', this book analyses the interactions between the development of the rule of law within China and the Chinese contribution to the international rule of law, more particularly in the areas of global trade and security governance.

In *Preservation of Ecosystems of International Watercourses and the Integration of Relevant Rules: An Interpretative Mechanism to Address the Fragmentation of International Law*, Lee Jing takes an innovative approach to developing an international legal framework for preserving ecosystems. Deploying Article 31(3)(c) of the 1969 Vienna Convention an analytical approach is devised that examines 'the ecosystem approach' under international law through the prism of Article 20 of the UN Watercourses Convention.

This illuminating book contributes to knowledge on the impact of Brexit on international commercial arbitration in the EU. Entering the fray at a critical watershed in the EU's history, Chukwudi Ojiegbe turns to the interaction of court litigation and international commercial arbitration, offering crucial insights into the future of EU law in these fields. *Knowledge, Policy, and Expertise* examines the evolving role of the Royal Commission on Environmental Pollution, and its influence on British environmental policy from its inception in 1970 to its closure in 2011. Drawing upon an extensive range of sources, this book provides the only full account of this influential body, and is a fascinating analysis of expertise and policy formation. *Knowledge, Policy, and Expertise* provides a wider contribution to insights on expertise and advisory practices, offering a rich and detailed account of authority, autonomy, and trust, of the diverse roles that advisors can play, and draws important lessons about the nature of constructive interaction. Above all, it demonstrates the complexity and contingency of these interactions, contributing substantially to a theory of expertise, and drawing out important implications for the future of 'good advice'.

This book provides valuable insights into various contemporary issues in public and private maritime law, including interdisciplinary aspects. The public law topics addressed include public international law and law of the sea, while a variety of private law topics are explored, e.g. commercial maritime law, conflict of laws, and new developments in the application of advanced technologies to maritime law issues. In addition, the book highlights current and topical discussions at international maritime forums such as the International Maritime Organization on regulatory and private law matters within the domain of marine environmental law, the law respecting seafarers' affairs and maritime pedagogics, maritime security, comparative law in the maritime field, trade law, recent case law analysis, taxation law in the maritime context, maritime arbitration, carriage of passengers, port law, and limitation of liability.

Leach's Tax Dictionary contains over 1,000 pages of definitions. It has three sections: the first lists definitions; the second is a list of abbreviations found in official

publications, including government press releases where new abbreviations are made up almost every week; and the third gives a list of tax rates and other information which may be of use to a tax accountant/lawyer.

Regulatory impact assessment (RIA) is the main instrument used by governments and regulators to appraise the likely effects of their policy proposals. This pioneering Handbook provides a comparative and comprehensive account of this tool, situating it in the relevant theoretical traditions and scrutinizing its use across countries, policy sectors and policy instruments. Comprising six parts, university researchers, international consultants and practitioners working in international organizations examine regulatory impact assessment from many perspectives, which include: • research traditions in the social sciences • implementation, regulatory indicators and effects • tools and dimensions such as courts and gender • sectoral case studies including environment, enterprise and international development • international diffusion in the European Union (EU), Americas, Asia and developing countries • appraisal, training and education. With its wealth of detail and lessons to be learned, the Handbook of Regulatory Impact Assessment will undoubtedly be of great value to practitioners and scholars working in governance, political science and socio-legal studies.

This open access book deals with Article 7 TEU measures, court proceedings, financial sanctions and the EU Rule of Law Framework to protect EU values with a particular focus on checks and balances in EU Member States. It analyses substantive standards, powers, procedures as well as the consequences and implications of the various instruments. It combines the analysis of the European level, be it the EU or the Council

of Europe, with that of the national level, in particular in Hungary and Poland. The LM judgment of the European Court of Justice is made subject to detailed scrutiny. This book seeks to find an answer to the question of how to rule a state well by drawing on a range of organizational, procedural, and substantive standards of administrative conduct developed within the framework of the Council of Europe (CoE) as an organization of a broader scope than the European Union.

*Jurisdiction over Ships: Post-UNCLOS Developments in the Law of the Sea* analyses international law developments in shipping since the adoption of the UN Convention on the Law of the Sea (UNCLOS) in 1982.
