A guide to the study of how and why you really make financial decisions While classical economics is based on the notion that people act with rational self-interest, many key money decisions—like splurging on an expensive watch—can seem far from rational. The field of behavioral economics sheds light on the many subtle and not-so-subtle factors that contribute to our financial and purchasing choices. And in Behavioral Economics For Dummies, readers will learn how social and psychological factors, such as instinctual behavior patterns, social pressure, and mental framing, can dramatically affect our day-to-day decision-making and financial choices. Based on psychology and rooted in real-world examples, Behavioral Economics For Dummies offers the sort of insights designed to help investors avoid impulsive mistakes, companies understand the mechanisms behind individual choices, and governments and nonprofits make public decisions. A friendly introduction to the study of how and why people really make financial decisions The author is a professor of behavioral and institutional economics at Victoria University An essential component to improving your financial decision-making (and even to understanding current events), Behavioral Economics For Dummies is important for just about anyone who has a bank account and is interested in why—and when—they spend money. In the modern era, sport has been an important agent, and symptom, of the political, cultural and commercial pressures for convergence and globalization. In this fascinating, inter-disciplinary study, leading international scholars explore the making of modern sport in Europe, illuminating sport and its cultural and economic impacts in the context of the supra-state formations and global markets that have re-shaped national and trans-national cultures in the later twentieth century. The book focuses on the emergence and expansion of media markets, high-performance sport's transformation by, and effects upon, Cold War dynamics and relations, and the implications of the Treaty of Rome for an emerging European identity in sport as in other areas (for example, the influence of soccer's governing body in Europe, UEFA, and its club and international competitions). It traces the connections between the forces of ideological division, economic growth, leisure consumption, European integration and the development of European sport, and examines the role of sport in the changing relationship between Europe and the US. Illuminating a key moment in global cultural history, this book is important reading for any student or scholar working in international studies, modern history or sport.

Janice Potter-MacKinnon traces the story of Loyalist women through their lives in the American colonies before the revolution, their experience as Loyalists living in a society increasingly antagonistic to the British Crown, their forced exodus from the colonies in the late 1770s and early 1780s, and their eventual settlement around present-day Kingston in Eastern Ontario. Potter-MacKinnon argues that the importance of the women's endeavours was obscured in the historical record because most accounts of the Loyalist experience were provided by Loyalist men attempting to explain to themselves how they had come to be exiled. She documents the women's vital services to the Crown in providing information and refuge to Loyalist lighters, maintaining open communication with Native allies, and helping provision the Loyalist forces. When the Loyalists sought to recoup their losses from the British government, however, these same women were depicted as weak supplicants who deserved help from the British government not for their deeds but because of their weakness and suffering. While the Women Only Wept contributes an important new perspective to Loyalist literature and adds a further chapter to women's history.

For Sid Tillsley, the end is near... When Sid Tillsley, the most prolific and lethal vampire hunter the world has ever known, cancels his subscription to "Tits" magazine, Middlesbrough locals know that something isn't right in the world. And that's an understatement... The vampire nation is ready to launch an assault on society. The Coalition, a council of vampires and humans whose purpose is to hide the existence of the creatures of the night, are almost powerless to stop them. They have one hope, not a person, but a molecule: Haemo, a drug that suppresses the vampire's need to feed. If Haemo doesn't work and the vampires take to the streets, life will never be the same again, and a new barbaric, violent age will devour mankind. Unfortunately, Sid cannot be called upon, for Sid has landed himself a legitimate job, is paying taxes, has stopped smoking and drinking, and hasn't had a kebab in over a month! But why? How? What could possibly change a Northern man so set in his ways? Vampires could never be so cruel. Such devilry, such wickedness, can only be the work of...womenfolk. ""Not even the most teeth-sharpened vampire aficionado will be able to guess how this one ends. I commend this book to all readers of both humour and vampire genres. Enjoy."" -Geoff Nelder, Cafe Doom 2nd Edition - the series has been revised and rewritten as of Sept 2014

Growing Up Without a Place to Call Home... Mattie has never known what it means to have a safe and loving family. She's had to rely on herself from an early age, as she and her siblings grew up with an alcoholic father and stepfather who were verbally and physically abusive, as well as neglectful. Finally, when Mattie is fourteen, the cycle of hurt and abandonment at the hands of her biological family comes to an end...only to throw her into a sea of new challenges as she experiences the wild ride of the foster system. Through four years and five foster homes that push her to the limit, Mattie develops inner strength that startles even the girl gang at her new school, when Mattie attracts the interest of a handsome boy who has already been claimed by the school bully. But Mattie doesn't give up easily-she can't afford to, moving around as much as she does. She goes through experiences unimaginable to most of us, including a nightmarish foster mother with a subservient husband and a mentally ill son; a cold and unloving home where she is valued only for the state-mandated money she brings to the foster family; and a bizarre but oddly endearing woman who treats Mattie as if she is a small child...and who has a secret hidden behind "the forbidden green door." Finally, Mattie is placed with a warm and loving family who nurture and cherish her, and allow her to blossom emotionally. But will she be ready to face life on her own when she turns 18 and has to leave them? And will she be able to embark on a journey of forgiveness and reconciliation with her family of origin? Vivid, realistic, compassionate, and compelling, Mattie Celi is the haunting and inspiring odyssey of a young woman determined to flourish despite the odds against her.

'We were quickly learning to live with war. We became very proficient at moving the patients who could walk quickly to the shelters when the sirens went. We were equally proficient at talking those who couldn't walk into believing that they would be safe where they were. Some believed us, others didn't.' Surprising Matron as well as herself, Evelyn Prentis managed to pass her Finals and become a staff-nurse. Encouraged, she took the brave leap of moving from Nottingham to London - brave not least because war was about to break. Not only did the nurses have to cope with stray bombs and influxes of patients from as far away Dunkirk, but there were also RAF men stationed nearby - which caused considerable entertainment and disappointment, and a good number of marriages ... But despite all the disruption to the hospital routine, Evelyn's warm and compelling account of a nurse in action, shows a nurse's life would always revolve around the comforting discomfort of porridge and rissoles, bandages and bedpans.

It was quiet now that Vanessa's funeral was over and everyone had gone back to their regular routines. I was afraid, unsure of what do, of what might happen. If something did happen, what would I do? I didn't know! I doubted my ability to do this; I had never been this confused and nervous in my life. I asked, "God what am I supposed to do?" I started to question my faith. Why did God do this to us? Was he mad at me for something I had done years ago? And now was the time for me to answer for my sins? I didn't know, I didn't understand. I just wanted all this to be a bad dream, but it wasn't; it was real. Baby Kathryn and I were on our own. H.K Fitzgerald was born in Washington, D.C. and lives in Chicago, Illinois. Essentially the last of the bare-knuckle heavyweight champions, John L. Sullivan was instrumental in the acceptance of gloved fighting. His charisma and popular appeal during this transitional period contributed greatly to making boxing a nationally popular, "legitimate" sport. Sullivan became boxing's first superstar and arguably the first of any sport. From his first match in the late 1870s through his final championship fight in 1892, this biography contains a thoroughly researched, detailed accounting of John L. Sullivan's boxing career. With special attention to the 1880s, the decade during which Sullivan came to prominence, it follows

Sullivan's skill development and discusses his opponents and fights in detail, providing various viewpoints of a single event. Beginning with a discussion of early boxing practices, the sport itself is placed within sociological, legal and historical contexts including anti-prize fighting laws and the so-called "color line." A complete record of Sullivan's career is also included. The discovery of a strange and superior warship sends Dion, youngest son of the king of Xanthos, and Chloe, a Phalesian princess, on a journey across the sea, where they are confronted by a kingdom far more powerful than they could ever have imagined. But they also find a place in turmoil, for the ruthless sun king, Solon, is dying. In order to gain entrance to heaven, Solon is building a tomb--a pyramid clad in gold--and has scoured his own empire for gold until there's no more to be found. Now Solon's gaze turns to Chloe's homeland, Phalesia, and its famous sacred ark, made of solid gold. The legends say it must never be opened, but Solon has no fear of foreigners' legends or even their armies. And he isn't afraid of the eldren, an ancient race of shape-shifters, long ago driven into the Wilds. For when he gets the gold, Solon knows he will live forever.

Desperate circumstances were something Evelyn Prentis had to get very used to when she began her life as a nurse. It was in 1934 that Evelyn left home for the first time to enrol as a trainee at a busy Nottingham hospital in the hope of £25 a year. A Nurse in Time is Evelyn's affectionate and funny account of those days of dedication and hardship, when never-ending nightshifts, strict Sisters and permanent hunger ruled life, and joy was to be found in a late-night pass and a packet of Woodbines. The second memoir in this collection is A Nurse in Action. Surprising Matron as well as herself, Evelyn Prentis managed to pass her Finals and become a staff-nurse. Encouraged, she took the brave leap of moving from Nottingham to London - brave not least because war was about to break. Not only did the nurses have to cope with stray bombs and influxes of patients from as far away Dunkirk, but there were also RAF men stationed nearby - which caused considerable entertainment and disappointment, and a good number of marriages ... But despite all the disruption to the hospital routine, Evelyn's warm and compelling account of a nurse in action, shows a nurse's life would always revolve around the comforting discomfort of porridge and rissoles, bandages and bedpans. Before being born, all humans visit the magical Shop Before Life to decide who they will become on Earth. Faythe accepts a once-in-a-prelifetime opportunity to become Apprentice at the Shop, and must discover its ancient secrets in order to save it-and all future humans-from destruction.

"The Virupa man discarded all of his weapons, thrusting them into the hands of the nearest clansmen, dropping into a fluid fighting stance as he turned to face her. Illiom did not emulate him. She was no fighter, and pretending to be one would certainly not transform her into one. She faced him and just allowed herself to sense what was happening inside her. She knew that she might die in the next few moments, but the greater part of her had already accepted that as a possible outcome. If she was to die, then let it be here and now - not hiding and cowering from the world." Much has changed since Tarmel came to take Illiom away from her lonely and timid existence. However her most pressing questions remain unanswered and, if anything, they have multiplied - alarmingly so. Something deep within her is beginning to shift. Already she no longer sees herself as the frightened girl who hid from the world in her mountain hideaway, and what she once considered to be her curse is now revealing itself to be much more of a strength. Her origins are still shrouded in complete mystery; yet now her role in the world, and the growing sense of direction within Illiom, are gathering momentum and form, shaping themselves into the one she is becoming. Like

an egg that is hatching, Illiom can hardly wait to meet the one who will emerge.

Using a corpus of data drawn from naturally-occurring second language conversations, this book explores the role of idiomaticity in English as a native language, and its comparative role in English as a lingua franca. Through examining how idiomaticity enables first language learners to achieve a greater degree of fluency, the book explores why idiomatic language poses such a challenge for users of English as a lingua franca. The book puts forward a new definition of competence and fluency within the context of English as a lingua franca, concluding with an analysis of practical implications for the lingua franca classroom. This in-depth study of English language learning using corpus data will be of interest to researchers in applied linguistics and corpus linguistics and to teachers of English as an international lingua franca.

One man's sacrifice shocks the world . . . One woman's courage threatens a conspiracy as old as humankind . . . And some will do anything—anything—to keep their secrets in the dark. Sanctus A man climbs a cliff face in the oldest inhabited place on earth, a mountain known as the Citadel, a Vatican-like city-state that towers above the city of Ruin in modern-day Turkey. But this is no ordinary ascent. It is a dangerous, symbolic act. And thanks to the media, it is an event witnessed by the entire world. Few people understand its consequence. But for foundation worker Kathryn Mann and a handful of others, it's evidence that a revolution is at hand. For the Sancti, the cowed and secretive monks who live inside the Citadel, it could mean the end of everything they have built. They will stop at nothing to keep what is theirs, and they will break every law in every country and even kill to hold it fast. For American reporter Liv Adamsen, it spurs the memory of the beloved brother she lost years before, setting her on a journey across the world and into the heart of her own identity. There, she will make a discovery so shocking that it will change everything. . . .

Robert Franklin Bunting was a Princeton-educated chaplain who served in the Confederate 8th Texas Cavalry, popularly known as Terry's Texas Rangers, which saw combat at Shiloh, Murfreesboro, and Chickamauga. The manuscript consists primarily of ninety-five letters that Bunting wrote to a variety of Texas newspapers. Designed primarily to describe the unit's movements and actions in detail, the letters also strove to maintain morale as the Confederates' prospects dimmed. Unlike most Civil War soldiers, Bunting wrote with the explicit purpose of publishing his correspondence, seeking to influence congregations of civilians on the home front just as he had done when he lectured them from the pulpit before the Civil War. Bunting's letters cover military actions in great detail, yet they were also like sermons, filled with inspiring rhetoric that turned fallen soldiers into Christian martyrs, Yankees into godless abolitionist hordes, and Southern women into innocent defenders of home and hearth. As such, the public nature of Bunting's writings gives the reader an exceptional opportunity to see how Confederates constructed the ideal of a Southern soldier. Taken as a whole, the letters provide a glimpse into a little-understood aspect of Civil War historiography: the war in which religion influenced the ideology of soldiers and civilians. They also provide a rare first-person perspective on the role of the chaplains in the Confederate Army. Finally, Bunting's letters display an example of successful wartime propaganda: the consistent optimism maintained in the letters doubtless encouraged soldiers in the ill-fated Army of the Tennessee to remain in the ranks for four long years.

'It must be stressed from the start that I was not a born nurse. Not every girl is. Not every nurse is either, however wholeheartedly she may throw herself into the project once she gets going. Born nurses can be easily recognised. They have a little something the others haven't got which never seems to desert them however desperate the circumstances may become' Desperate circumstances were something Evelyn Prentis had to get very used to when she began her life as a nurse. It was in 1934 that Evelyn left home for the first time to enrol as a trainee at a busy Nottingham hospital in the hope of £25 a year. *A Nurse in Time* is her affectionate and funny account of those days of dedication

and hardship, when never-ending nightshifts, strict Sisters and permanent hunger ruled life, and joy was to be found in a late-night pass and a packet of Woodbines.
