You've taken your introduction to evaluation course and are about to do your first evaluation project. Where do you begin? Interactive Evaluation Practice: Managing the Interpersonal Dynamics of Program Evaluation helps bridge the gap between the theory of evaluation and its practice, giving students the specific skills they need to use in different evaluation settings. Jean A. King and Laurie Stevahn present readers with three organizing frameworks (derived from social interdependence theory from social psychology, evaluation use research, and the evaluation capacity building literature) for thinking about evaluation practice. These frameworks help readers track the various skills or strategies to use for distinctive evaluation situations. In addition, the authors provide explicit advice about how to solve specific evaluation problems. Numerous examples throughout the text bring interactive practice to life in a variety of settings. Shows how to develop Office 2007 prowess with over 50 educational screencasts! The International Board for the Certification of Safety Managers (IBFCSM) has designated this text as the Primary Study Reference for those preparing to sit for the Certified Hazard Control Manager (CHCM) and the Certified Hazard Control Manager-Security (CHCM-SEC) Examinations. Introduction to Hazard Control Management: A Vital Organizational Function explains how proven management and leadership principles can improve hazard control and safety management effectiveness in organizations of all types and sizes. This introductory text addresses hazard control and safety management as organizational functions, instead of just programs. It not only supplies a broad overview of essential concepts—including identifying, analyzing, and controlling hazards—but also promotes the importance of safe behaviors. Written by the Executive Director of IBFCSM, the book covers a broad array of hazards that can exist in most organizations. It focuses on the need to use good leadership, effective communication, and proven management techniques to prevent organizational losses. Addresses the inter-relationships of various organizational functions that support hazard control, accident prevention, and safety Includes an overview of emergency management, hazardous materials, and fire safety management Reviews occupational health, radiation safety, and emerging hazards such as nanotechnology and robotic safety Emphasizing the importance of effective communication skills in hazard control efforts, this book promotes an understanding of system safety methodologies and organizational culture to help you control hazards, prevent accidents, and reduce other losses in your organization. It expands on the foundational principles contained in the pamphlet: The Management Approach to Hazard Control. This book is an ideal reference for anyone wanting to learn more about managing hazards, encouraging safe behaviors, and leading hazard control efforts.

The balance between individual independence and social interdependence is a perennial debate in Japan. A series of educational reforms since 1990, including the implementation of a new curriculum in 2002, has been a source of fierce controversy. This book, based on an extended, detailed study of two primary schools in the Kinki district of Japan, discusses these debates, shows how reforms have been implemented at the school level, and explores how the balance between individuality and social interdependence is managed in practice. It discusses these complex issues in relation to personal identity within the class and within the school, in relation to gender issues, and in relation to the teaching of specific subjects, including language, literature and mathematics. The book concludes that, although recent reforms have tended to stress individuality and independence, teachers in primary schools continue to balance the encouragement of individuality and self-direction with the development of interdependence and empathy.

A clear and concise guide to teaching reading strategies to young learners.

The Four Disciplines of Execution is about a simple, proven formula for reaching the goals you want to reach as a business or individual. In Covey's experience, the thing that most undermines the ability to execute goals is what he calls the Whirlwind: those urgent tasks that must be done simply to keep an organization alive. As Covey shows, the only way to execute new, important goals is to separate those goals from the Whirlwind. The Four Disciplines allow leaders to create a strategy that requires a change in behaviour, since only by ensuring that everyone on the team understands the goal, knows what to do to reach it and knows whether progress is being made, will a leader produce consistent breakthrough results while sustaining the urgent work of the Whirlwind. The Four Disciplines of Execution are: 1. Focus on the Wildly Important; 2. Act on the Lead Measures; 3. Keep a Compelling Scoreboard; 4. Create a Cadence of Accountability. For more than a decade Franklin Covey has been studying what it takes to achieve important goals, and in this book they share success stories from a wide range of companies that have implemented the Four Disciplines to result in greater profits, increased market share and improved customer satisfaction. This way of thinking is essential to any company that wants to not only weather, but thrive in this economy.
