Transcripts of more than seventy-five oral history interviews in which the interviewees assess their MIT experience and reflect on the role of blacks at MIT and beyond. This book grew out of the Blacks at MIT History Project, whose mission is to document the black presence at MIT. The main body of the text consists of transcripts of more than seventy-five oral history interviews, in which the interviewees assess their MIT experience and reflect on the role of blacks at MIT and beyond. Although most of the interviewees are present or former students, black faculty, administrators, and staff are also represented, as are nonblack faculty and administrators who have had an impact on blacks at MIT. The interviewees were selected with an eye to presenting the broadest range of issues and personalities, as well as a representative cross section by time period and category. Each interviewee was asked to discuss family background; education; role models and mentors; experiences of racism and race-related issues; choice of field and career; goals; adjustment to the MIT environment; best and worst MIT experiences; experience with MIT support services; relationships with MIT students, faculty, and staff; advice to present or potential MIT students; and advice to the MIT administration. A recurrent theme is that MIT's rigorous teaching instills the confidence to deal with just about any hurdle in professional life, and that an MIT degree opens many doors and supplies instant credibility. Each interview includes

biographical notes and pictures. The book also includes a general introduction, a glossary, and appendixes describing the project's methodology.

A Player's Guide to the Post-Truth Condition: The Name of the Game presents sixteen short, readable chapters designed to leverage our post-truth condition's deep historical and philosophical roots into opportunities for unprecedented innovation and change. Fuller offers a bracing, proactive and hopeful vision against the tendency to demonize post-truth as the realm of 'fake news' and 'bullshit'. Where others see threats to the established order, Fuller sees opportunities to overturn it. This theme is pursued across many domains, including politics, religion, the economy, the law, public relations, journalism, the performing arts and academia, not least academic science. The red thread running through Fuller's treatment is that these domains are games that cannot be easily won unless one can determine the terms of engagement, which is to say, the 'name of the game'. This involves the exercise of 'modal power', which is the capacity to manipulate what people think is possible. Once the 'necessarily' true appears to be only 'contingently' so, then the future suddenly becomes a more open space for action. This was what frightened Plato about the alternative realities persuasively portrayed by playwrights in ancient Athens. Nevertheless, Fuller believes that it should be embraced by denizens of today's post-truth condition.

In this autobiography the author chronicles events in his parents lives in a rural Missouri river town in the 1900s. Their experiences seasoned his character during his childhood in the 60s that is described in the later half of the book. This memoir was written for the authors children as a way for them to know their heritage. The experiences in the authors life shaped his character and were vastly different from his childrens lives as times changed. The book is dedicated to the authors wife who was instrumental in its completion. These events and escapades are presented in a light-hearted, story telling format.
