Emerging from a critical analysis of the global power of English and how it relates to academic literacy and culturally responsive pedagogy, this book presents translanguaging strategies for using ESL students' mother tongue as a resource for academic literacy acquisition and college success. Parmegiani offers a strong counterpoint to the "English-only" movement in the United States. Grounded in a case study of a learning community linking Spanish and English academic writing courses, he demonstrates that a mother tongue-based pedagogical intervention and the strategic use of minority home languages can promote English language acquisition and academic success.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Taking the CUNY Assessment Test in Writing (CATW) provides the strategies and models students need to write an effective response to the CATW exam. It includes an overview of the exam's format, an explanation of how the exam will be assessed, a step-by-step guide to crafting an effective written response to a sample reading passage, tips for editing and proofreading, and lots of opportunities for practice. Whether used in a developmental writing course or by students preparing on their own, this guide can help students improve their writing and ace the CATW exam.

The Encyclopedia of New York State is one of the most complete works on the Empire State to be published in a half-century. In nearly 2,000 pages and 4,000 signed entries, this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas, as a cradle of abolitionism and feminism, and as an apex of modern urban, suburban, and rural life. The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history. Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world, but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi; New York is the only state to border both the Great Lakes and the Atlantic Ocean; the Erie Canal opened New York City to rich farmland upstate . . . and to the west. Entries by experts chronicle New York's varied areas, politics, and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads, weaving the state's diverse regions and peoples into one idea of New York State. Lavishly illustrated with 500 photographs and figures, 120 maps, and 140 tables, the Encyclopedia is key to understanding the state's past, present, and future. It is a crucial reference for students, teachers, historians, and business people, for New Yorkers of all persuasions, and for anyone interested in finding out more about New York State.

Online education has become a major component of higher education worldwide. In mathematics and statistics courses, there exists a number of challenges that are unique to the teaching and learning of mathematics and statistics in an online environment. These challenges are deeply connected to already existing difficulties related to math anxiety, conceptual understanding of mathematical ideas, communicating mathematically, and the appropriate use of technology. Teaching and Learning Mathematics Online bridges these issues by presenting meaningful and practical solutions for teaching mathematics and statistics online. It focuses on the problems observed by mathematics instructors currently working in the field who strive to hone their craft and share best practices with our professional community. The book provides a set of standard practices, improving the quality of online teaching and the learning of mathematics. Instructors will benefit from learning new techniques and approaches to delivering content. Features Based on the experiences of working educators in the field Assimilates the latest technology developments for interactive distance education Focuses on mathematical education for developing early mathematics courses

Manhattan Prep's 5 lb. Book of GRE Practice Problems is an essential resource for students of any level who are preparing for the GRE revised General Exam. Recently updated to more closely reflect the nuances of the GRE exam, this book offers more than 1,800 questions across 33 chapters and online to provide students with comprehensive practice. Developed by our expert instructors, the problems in this book are sensibly grouped into practice sets and mirror those found on the GRE in content, form, and style. Students can build fundamental skills in math and verbal through targeted practice while easy-to-follow explanations and step-by-step applications help cement their understanding of the concepts tested on the GRE. In addition, students can take their practice to the next level with online question banks that provide realistic, computer-based practice to better simulate the GRE test-taking experience. Purchase of this book includes access to an online video introduction, online banks of GRE practice problems, and the GRE Challenge Problem Archive.

In the late 1960s, colleges and universities became deeply embroiled in issues of racial equality. To combat this, hundreds of new programs were introduced to address the needs of "high-risk" minority and low-income students. In the years since, university policies have flip-flopped between calls to address minority needs and arguments to maintain "Standard English." Today, anti-

affirmative action and anti-access sentiments have put many of these high-risk programs at risk. In *Interests and Opportunities*, Steve Lamos chronicles debates over high-risk writing programs on the national level, and locally, at the University of Illinois at Urbana-Champaign. Using critical race theorist Derrick Bell's concept of "interest convergence," Lamos shows that these programs were promoted or derailed according to how and when they fit the interests of underrepresented minorities and mainstream whites (administrators and academics). He relates struggles over curriculum, pedagogy, and budget, and views their impact on policy changes and course offerings. Lamos finds that during periods of convergence, disciplinary and institutional changes do occur, albeit to suit mainstream standards. In divergent times, changes are thwarted or undone, often using the same standards. To Lamos, understanding the past dynamics of convergence and divergence is key to formulating new strategies of local action and "story-changing" that can preserve and expand race-consciousness and high-risk writing instruction, even in adverse political climates.

Why are some individuals relatively more successful than others in achievement? And why are some countries (or regions), for that matter, relatively more successful than others in development? Contrary to the conventional wisdom held by many, Dr. Baofu argues that the nature-nurture debate is misleading and faulty, since his "transcendent approach" is to show how and why the two are closely intertwined in producing the behavioral differences as often seen in individual human endeavors on the micro scale, and for that matter, in country (or regional) endeavors on the macro one—without, however, committing "the compromise fallacy" as often seen in an in-between alternative. The debate also obscures something more tremendous in the long run, in relation to the emergence of what Dr. Baofu originally proposed as the "post-human" world that humans have never known, when human genes will no longer exist. Human genes have their days numbered.

This text-reader brings together powerful readings that critically situate issues of education in the context of the major cultural, moral, political, economic, ecological, and spiritual crises that confront us as a nation and a global community. It provides a focus and a conceptual framework for thinking about education in light of these issues. Readers are exposed to the thinking of some of the best and most insightful social and educational commentators. *Critical Social Issues in American Education: Democracy and Meaning in a Globalizing World*, Third Edition, is intended to work on two levels. First, it helps readers to develop an awareness of how education is connected to the wider social structures of cultural, political, and economic life. Second, it encourages not only a critical examination of our present social reality but also a serious discussion of alternatives--of what a transformed society and educational process might look like. The editors' goal is to deliberately engage readers in connecting the work of teachers to an ethically committed, politically charged pedagogy. The assumption on which they base the text is that educators must see their work as inextricably linked to the

broader conflicts, stresses, and crises of the social world--it is not otherwise possible to make sense of what is happening educationally. What happens in school, or as part of the educational experience, reflects, expresses, and mediates profound questions about the direction and nature of the society we inhabit. The text is organized thematically into five sections, which address, respectively, social justice and democracy; consumerism, culture, and public education; marginality and difference; moral and spiritual perspectives on education; and globalization and education. Each section is preceded by a brief essay that introduces the readings. This Third Edition includes many new readings and addresses issues that have more recently emerged as especially significant--such as concerns about the implications of globalization and the post 9/11 world, commercialism, violence, and the ever-increasing influence of high stakes testing. This compelling text is relevant for a wide range of courses in educational foundations, educational policy, curriculum studies, and multicultural education that address the social context of education, cultural and political change, and public policy.

A guide to the nation's colleges publishes extensive surveys--all written by current or past students--from over three hundred educational institutions, covering admission, academics, quality of life, social life, and employment prospects. The Oxford Handbook of New York State Government and Politics brings together top scholars and former and current state officials to explain how and why the state is governed the way that it is. The book's thirty-one chapters assemble new scholarship in key areas of governance in New York, document the state's record in comparison to other U.S. states, and identify directions for future research.

CUNY Assessment Tests Secrets Study Guide CUNY Exam Review for the CUNY Assessment Tests Mometrix Media Llc "Psychological Investigations" lets readers listen in on one of the most exciting developments in psychology today as it is unfolding. With the current trend in therapy reflecting a movement away from traditional psychology and towards more postmodern psychologies, social therapy, a psychotherapeutic approach developed by Fred Newman, emerges as a qualitatively new way of doing therapy. Social therapy blends philosophy, the arts, and political concerns into a group approach that focuses on improved social functioning. "Psychological" "Investigations" provides insight into the revolutionary development of social therapy--an improvisational, investigatory, development-focused method of treatment. Featuring dialogues drawn from transcripts of teaching and supervisory sessions between Newman and therapists, the book presents a comprehensive guide to the core philosophical and political issues of social therapy and the social therapeutic group process. Instead of introspection and insight--traditional means to self-realization--Newman and social therapy encourages activity, involvement and commitment to causes larger than the individual ego.
