A comprehensive, easy-to-understand guide to the entire research process, this book quickly and efficiently equips advanced students and research assistants to conduct a full-scale investigation. The book is organized around the idea of a 'research script' that is, it follows the standard mode of research planning and design, data collection and analysis, and results writing. The volume contains 35 chapters, some co-authored by advanced graduate students who give their fellow students a touch of the 'real world' adding to the clarity and practicality of many chapters.

This book is a comprehensive analysis of the definitions, concepts, and recent research on malingering, feigning, and other response biases in psychological injury/ forensic disability populations. It presents a new model of malingering and related biases, and develops a "diagnostic" system based on it that is applicable to PTSD, chronic pain, and TBI. Included are suggestions for effective practice and future research based on the literature reviews and the new systems, which are useful also because they can be used readily by psychiatrists as much as psychologists. In *Malingering, Feigning, and Response Style Assessment in Psychiatric/Psychological Injury*, Dr. Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities, including PTSD, pain, and TBI. He does so thoroughly and very even-handedly, neither minimizing the degree that outright faking

can be found in substantial numbers of examinees, nor disregarding the possibility that there can be causes for validity test failure other than malingering. He reviews the prior systems for classifying evidence of malingering, and proposes his own criteria for feigned PTSD. These are conservative and well-grounded in the prior literature. Finally, the book contains dozens of very recent references, giving testament to Dr. Young's immersion in the personal injury literature, as might be expected from his experience as founder and Editor in Chief for Psychological Injury and the Law.
