The first collection of a wide range of work by Betty Hahn, an innovative photographic artist whose work is witty and provocative.

Since the publication of the best-selling first edition of *The Satellite Communication Applications Handbook*, the satellite communications industry has experienced explosive growth. Satellite radio, direct-to-home satellite television, satellite telephones, and satellite guidance for automobiles are now common and popular consumer products. Similarly, business, government, and defense organizations now rely on satellite communications for day-to-day operations. This second edition covers all the latest advances in satellite technology and applications including direct-to-home broadcasting, digital audio and video, and VSAT networks. Engineers get the latest technical insights into operations, architectures, and systems components.

Too often literary criticism is academic exercise rather than creative act. For the multifaceted Julio Ortega—respected poet, dramatist, and novelist in his own right—the act of criticism becomes profoundly creative, his incisive readings of the text far transcending the pedantry that may falsely pass for imagination, intelligence, and rigor. Nearly every Spanish-American writer of consequence, from Paz to Fuentes, Cortázar to Lezama Lima, has extolled

Ortega's criticism as not merely a reflection but an essential part of the renaissance that took place in Spanish-American letters during the late twentieth century. Poetics of Change brings together Ortega's most penetrating and insightful analyses of the fiction of Borges, Fuentes, García Márquez, Carpentier, Rulfo, Cabrera Infante, and others responsible for great writing from Spanish America. Ortega concerns himself most with the semantic innovations of these masters of the modern narrative and their play with form, language, and the traditional boundaries of genre. Mapping their creative territory, he finds that the poetics of Spanish-American writing is that of a dynamically changing genre that has set exploration at its very heart. Agnes Sorel

A runaway New York Times bestseller that was named one of the ten best books of the year by Time and USA Today, *The Guernsey Literary and Potato Peel Pie Society* has captivated readers around the world. Told with warmth and humor in a series of letters, this is a tale of finding connection in the most unexpected places. January 1946: As London emerges from the Second World War, writer Juliet Ashton is looking for her next book subject. Who could imagine that she would find it in a letter from a man she's never met, a native of Guernsey, the British island once occupied by the Nazis? As Juliet begins a remarkable correspondence, she is drawn into the world of this man and his friends, all members of the Guernsey Literary and Potato Peel Pie Society, a book club formed to protect its members from arrest by the Germans. Through their letters, she learns about their island, their taste in books, and the powerful, transformative impact the Occupation has had on their lives. Captivated by their stories, she sets sail for Guernsey. What she finds there will change her forever.

The Low Protein Food List for PKU has been an indispensable resource for everyone involved in the treatment of phenylketonuria (PKU) since 1995. This third edition contains over 6,000 entries, the most extensive listing yet of foods that are potentially suitable for the diet, nearly double the number found in the previous edition. It includes many new foods

found at health-oriented grocery stores, expanding choices for the diet. The book provides information on phenylalanine (phe), protein, and calorie content of foods based on serving portions, both in common measures and gram weights, in an easily searchable format. The handy "mg phe/gm food" column allows users to compare phenylalanine density of foods and make appropriate food choices for individual diet needs. People using an "exchange" system for counting phe will find exchanges are calculated for each food portion as well. The front section of the book also contains valuable information and tips for managing the PKU diet.

Arguably one of Americas most unconventional art/cultural critics

Agnes Sorel was the most beautiful woman in the world. Armed with an incredible physique, she was set to change history forever. At 18, she already knew she was destined to rule a great nation. To do so, she learnt to seduce men whilst maintaining her virginity - one such victim being King Charles VII of France, who in turn allowed her to rule his country and lead Europe out of the Middle Ages. Never before had such use of sexual savoir-faire played such an influential role in history.

The classic guide to UNIX® programming-completely updated! UNIX application programming requires a mastery of system-level services. Making sense of the many functions-more than 1,100

functions in the current UNIX specification-is a daunting task, so for years programmers have turned to *Advanced UNIX Programming* for its clear, expert advice on how to use the key functions reliably. An enormous number of changes have taken place in the UNIX environment since the landmark first edition. In *Advanced UNIX Programming, Second Edition*, UNIX pioneer Marc J. Rochkind brings the book fully up to date, with all-new, comprehensive coverage including: POSIX Solaris™ Linux® FreeBSD Darwin, the Mac™ OS X kernel And more than 200 new system calls

Rochkind's fully updated classic explains all the UNIX system calls you're likely to need, all in a single volume! Interprocess communication, networking (sockets), pseudo terminals, asynchronous I/O, advanced signals, realtime, and threads Covers the system calls you'll actually use-no need to plow through hundreds of improperly implemented, obsolete, and otherwise unnecessary system calls! Thousands of lines of example code include a Web browser and server, a keystroke recorder/player, and a shell complete with pipelines, redirection, and background processes Emphasis on the practical-ensuring portability, avoiding pitfalls, and much more! Since 1985, the one book to have for mastering UNIX application programming has been Rochkind's *Advanced UNIX Programming*. Now completely updated, the second edition remains

the choice for up-to-the-minute, in-depth coverage of the essential system-level services of the UNIX family of operating systems.

The perfect match of content and format: Craft supplies, a full-color how-to book and nobody-else-but-Klutz creativity, all packed in a sturdy, re-usable plastic jar with a screw-top lid and a rope handle. The whole package is incredibly bright, cheerful, easy to stack and display, and completely shopwear-proof. Start with an empty Klutz Bucket. Fill with wooden animal shapes. Add eight acrylic craft paints, one brush, a fine point black marker and a 40-page Klutz book of full-color, paint-this-critter inspiration. And then, right at the end, toss in a good supply of wiggle eyes. End result? A zoo in a bucket. With it you can paint 24 wooden die-cut blanks into things like Technicolor tigers or polka-dotted pandas, paying absolutely no attention whatsoever to the way they're actually supposed to look.

Few art critics in Western art history have ever had the broad-ranging impact over several decades of Donald Kuspit, a philosopher and psychoanalyst who from 1970 until the present has been a commanding figure on the international stage. A student of German thinker Theodor Adorno under whom he earned the first of his three doctorates, Kuspit introduced a new type of philosophical art criticism into the art world. He drew on both phenomenology and Critical Theory before he then increasingly adopted psychoanalysis. Since Kuspit himself has always measured his own place in the history of art criticism by how rigorously he engages with competing approaches, this book is a searching survey

of Kuspit's role in triggering several historic shifts within art criticism, beginning with his now legendary 1974 article in *Artforum*, "A Phenomenological Approach to Artistic Intention." Dense and demanding, yet deft and incisive, Kuspit's multi-faceted art criticism has become world famous for reasons that artists, critics, art historians, and philosophers from at least ten different nations explain from various points of view. Divided into three parts and introduced by a lengthy introduction, the book features comments by recognized artists like Rudolf Baranik, Anselm Kiefer, and April Gornik, as well as critical commentaries by many scholars and critics from around the world on the richness of Kuspit's insights into art.

Nuclear criticality safety is the prevention of nuclear chain reactions in fissile materials outside of reactors. This book presents the underlying principles of nuclear criticality safety theory along with descriptions of the principal methods currently used and their in-plant applications. Exercises are provided at the end of each chapter to increase understanding of the text.

"John D'Agata is an alchemist who changes trash into purest gold." —Guy Davenport, *Harper's* John D'Agata journeys the endless corridors of America's myriad halls of fame and faithfully reports on what he finds there. In a voice all his own, he brilliantly maps his terrain in lists, collage, and ludic narratives. With topics ranging from Martha Graham to the Flat Earth Society, from the brightest light in Vegas to the artist Henry Darger, who died in obscurity, *Halls of Fame* hovers on the brink between prose and poetry, deep seriousness and high

comedy, the subject and the self.

From USA Today bestselling author Mary Daheim comes her latest Bed-and-Breakfast book featuring innkeeper Judith McMonigle Flynn and her irrepressible cousin Renie in a mystery that takes them on the wrong side of the tracks. . . . Loco Motive It's autumn at Hillside Manor B&B, and with the changing leaves come some unexpected guests. There's Judith's son and daughter-in-law, with their two children in tow, a couple with an impossible (and unbelievable?) last name who show up from nowhere, and a pair of giggly young women who don't seem to know where they're going. As Halloween draws nigh, Judith can barely cope with her gala of guests, but at least the worst guest from the first part of the week checks out—almost permanently. Wee Willie Weevil, infamous daredevil and martial-arts movie icon, insisted on performing his dangerous stunts from Judith's roof and left the B&B via an ambulance. Hoping to escape the domestic mayhem, Judith agrees to accompany Renie on a cross-country train trip to Boston with first-class accommodations on the Empire Builder. Judith's bubble bursts when she discovers that Wee Willie and his entourage are fellow travelers. Although confined to a wheelchair, the diminutive stunt man seems capable of derailing the cousins' vacation. Cousin Renie does her best to ease Judith's mind until the train collides with a truckload of sugar beets. Forced to wait for a new engine in a small Montana town in the middle of nowhere, the passengers can do nothing but watch and wait. Even before the train can get back on track, the cousins discover that their sleeper attendant has gone

missing. Worse yet, another passenger's final destination is the nearest morgue. Judith and Renie have to move full speed ahead if they want to blow the whistle on the killer before death strikes again. Can the train continue its journey? Will the cousins ever get to Boston? Stay aboard!

In this outline Kenneth E. Hagin says",He leads the believer into a knowledge of intercessions, encouraging him to experience all that God has for him in this area". The Word to become keen intercessors This book details the factors involved in the injection moulding process, from material properties and selection to troubleshooting faults, and includes the equipment types currently in use and machine settings for different types of plastics. Material flow is a critical parameter in moulding and there are sections covering rheology and viscosity. High temperature is also discussed as it can lead to poor quality mouldings due to material degradation. The text is supported by 74 tables, many of which list key properties and processing parameters, and 233 figures; there are also many photographs of machinery and mouldings to illustrate key points. Troubleshooting flow charts are also included to indicate what should be changed to resolve common problems. Injection moulding in the Western World is becoming increasingly competitive as the manufacturing base for many plastic materials has moved to the East. Thus, Western manufacturers

have moved into more technically difficult products and mouldings to provide enhanced added value and maintain market share. Technology is becoming more critical, together with innovation and quality control. There is a chapter on advanced processing in injection moulding covering multimaterial and assisted moulding technologies. This guide will help develop good technical skills and appropriate processing techniques for the range of plastics and products in the marketplace. Every injection moulder will find useful information in this text, in addition, this book will be of use to experts looking to fill gaps in their knowledge base as well as those new to the industry. ARBURG has been manufacturing injection moulding machines since 1954 and is one of the major global players. The company prides itself on the support offered to clients, which is exemplified in its training courses. This book is based on some of the training material and hence is based on years of experience.

Wanted: Company Daughters. Virtuous young ladies to become the brides of industrious settlers in a foreign land. The Company will pay the cost of the lady’s dowry and travel. Returns not permitted, orphans

preferred. Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana's future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a colonial Dutch outpost to become the brides of male settlers they know nothing about. With fear in their hearts, the girls begin their journey – but what awaits them on the other side of the world is nothing like what they've been promised... Based on true history, this is a gripping and unputdownable historical novel, perfect for fans of *Girl with a Pearl Earring*, *The Miniaturist* and *The Indigo Girl*. WINNER OF THE 2021 GOLDEN CROWN LITERARY SOCIETY AWARD FOR DEBUT FICTION. FINALIST FOR THE 2021 BISEXUAL BOOK AWARDS. LONGLISTED FOR THE 2021 HWA DEBUT CROWN AWARD. What readers are saying about *The Company Daughters*: 'Blew my mind... a book I've told so many people

about purely because I'm still in disbelief that it exists, that it's so magically written and most of all that it is based on true events... a hard-hitting, soul-crushing book of a woman's struggle to survive... I loved every moment of it. Breathlessly, and in a way that took up my entire brain... immersive, heart-wrenching, and I feel emotional writing this review.' Goodreads reviewer, 5 stars 'From the moment I started reading *The Company Daughters*, I was captivated by this historical tale. Although it does contain a love story, it's not a romance... This was a gripping read.' Goodreads reviewer 'This book is so stunningly tender and beautiful, all mixed in with some seriously tragic and heart-wrenching events... Rajaram is an extremely skilled writer, and I love her writing style... The themes of sisterhood and female love were so present in this book and I found it very moving.' Goodreads reviewer 'I was enchanted by this book! It's a delightful read that will have your emotions all over the place.' Goodreads reviewer 'I love historical fiction, and this book touched on a topic and time I knew nearly nothing about... There's love, there's loss, there's surviving, there's thriving... It was a very beautiful book.' Goodreads reviewer 'The *Company Daughters* is a beautifully written love story... a perfect example of the power of human will and the endurance and hope that love can give a person.' Goodreads reviewer, 5 stars 'This book has a beauty and grace to it. The

author's writing just flows off the page, and although there are struggles and upsets by the time you close the book over you are filled with a warm glow.'

Goodreads reviewer 'A powerful and insightful read.

I look forward to reading more historical work by

Samantha Rajaram!' Goodreads reviewer

'Heartbreaking... a moving book... vivid, with amazing characters... This is a great read.'

Two-armed response-adaptive clinical trials are modelled as Markov decision problems to pursue two overriding objectives: Firstly, to identify the superior treatment at the end of the trial and, secondly, to keep the number of patients receiving the inferior treatment small. Such clinical trial designs are very important, especially for rare diseases. Thomas Ondra presents the main solution techniques for Markov decision problems and provides a detailed description how to obtain optimal allocation sequences.

Today, a scientific explanation is not meant to ascribe agency to natural phenomena: we would not say a rock falls because it seeks the center of the earth. Even for living things, in the natural sciences and often in the social sciences, the same is true. A modern botanist would not say that plants pursue sunlight. This has not always been the case, nor, perhaps, was it inevitable. Since the seventeenth century, many thinkers have made agency, in

various forms, central to science. The Restless Clock examines the history of this principle, banning agency, in the life sciences. It also tells the story of dissenters embracing the opposite idea: that agency is essential to nature. The story begins with the automata of early modern Europe, as models for the new science of living things, and traces questions of science and agency through Descartes, Leibniz, Lamarck, and Darwin, among many others. Mechanist science, Jessica Riskin shows, had an associated theology: the argument from design, which found evidence for a designer in the mechanisms of nature. Rejecting such appeals to a supernatural God, the dissenters sought to naturalize agency rather than outsourcing it to a “divine engineer.” Their model cast living things not as passive but as active, self-making machines. The conflict between passive- and active-mechanist approaches maintains a subterranean life in current science, shaping debates in fields such as evolutionary biology, cognitive science, and artificial intelligence. This history promises not only to inform such debates, but also our sense of the possibilities for what it means to engage in science—and even what it means to be alive.

The missing dead call to Violet. They want to be found. Violet can sense the echoes of those who've been murdered—and the matching imprint that clings to their killers. Only those closest to her know what

she is capable of, but when she discovers the body of a young boy she also draws the attention of the FBI, threatening her entire way of life. As Violet works to keep her morbid ability a secret, she unwittingly becomes the object of a dangerous obsession. Normally she'd turn to her best friend, Jay, except now that they are officially a couple, the rules of their relationship seem to have changed. And with Jay spending more and more time with his new friend Mike, Violet is left with too much time on her hands as she wonders where things went wrong. But when she fills the void by digging into Mike's tragic family history, she stumbles upon a dark truth that could put everyone in danger.

This series will present twenty short, sharply-focused tracts, each one covering one of the many aspects of concrete technology: materials, design, construction, testing, and other significant aspects. Volume 1 provides a complete overview of the mineral admixtures used in concrete, including silica fume, slag, rice-husk ash, fly ash, and natural pozzolans. This book will include the mineral and chemical composition of the admixtures, their chemical reactions with cement and as a method of recycling. Essays by a humorist-satirist on the paradoxical elements and situations of the American mind and society.

Over the past twenty-five years, Chicano artists have made a unique contribution to public art in California,

transforming thousands of walls into colorful artworks that express the dreams, achievements, aspirations, and cultural identity of the Mexican-American community. *Signs From the Heart* tells the inside story of this new and important American art form in four interpretive essays by noted Chicano scholars about its historical, artistic, and educational significance.

The general response to the first edition of the book was very encouraging. Authors feel that their work has been amply rewarded and wish to express their deep sense of gratitude, in general to the large number of readers who have used it, and in particular to those of them who have sent helpful suggestions from time to time for the improvement of the book. The continuous feedback from the readers has helped the authors to make the book more useful.
