The post-9/11 era and the overall impact of international terrorism have generated much debate regarding the role of military apparatus in modern society. This book assesses the inherent meaning of the militarization from a critical, interdisciplinary perspective. Against the background of democracy and capitalism, *The Marketing of War in the Age of Neo-Militarism* challenges prevailing accounts of the "military-industrial complex" as it explores significant interrelated themes denoting the accelerating process of militarization of society. Designed to address pressing socio-political phenomena, this book is the first of its genre contesting conventional wisdom about the perceived link between war and the "military-industrial complex." It is unique not merely because of its approach, but also for its thorough analysis of deeply affected social institutions and processes such as education, popular culture, geopolitics, military expenditure, space and the environment. Contributing authors advance the discussion by exposing factual information demonstrating the nature and scope of society's militarization. Their analysis is also broadened to encompass key concepts and diverse aspects of the subject matter that provoke a lively debate. The book offers compelling arguments that

The main purpose of the book is to introduce the work of Alan S. Milward and to acknowledge the full magnitude of his scientific contribution to contemporary British and European history. The book is a collection of essays which provide a better understanding of Alan Milward's extensive intellectual work for future scholars and facilitate the knowledge and transmission of his published work to present and future generations of students, scholars in the various disciplines concerned, and the general public. The series of original contributions which this book contains are related to or reflect critically upon Milward's own contributions to the fields of political, diplomatic, and socio-economic history, political science, economics, international relations, and European Studies in general. This book honors Alan Milward through a better understanding of his many pioneering contributions in the fields of contemporary European history in general, and the history of European integration in particular. Although the volume does not aim to be a substitute for Milward's work itself, it illuminates and assesses his creative process along fifty years of continued and intense work, as well as the impact of his main work, and the continuing relevance of his main theses today.

Many of the US criticisms of Western European reluctance to engage in the 2004 war in Iraq stem from a perception that these governments are 'weak on defence' or unwilling to 'pull their own weight' in the international system. Secretary Rumsfeld pejoratively designated traditional Atlantic Alliance allies as 'Old Europe', to distinguish them from the freshly minted, cooperative states of 'New Europe'. In doing so, Rumsfeld accused 'Old Europe' of yet again relying on the United States to solve shared security problems. This volume critically evaluates the validity of this view of Western European choices and policies. Rather than a primary reliance on military force as first line defence, it proposes that Western European governments are expanding the set of tools they have to apply to the post-Cold War array of security and defence problems. The volume examines the emergent European security approach from multiple perspectives, in multiple institutions and identities, and in different geographic contexts.

The aftermath of the US subprime mortgage crisis in 2008 saw its influence spread around the world, including Europe. The European crisis turned out to be longer, deeper and more resilient than anticipated. An unexpected consequence was the increasingly divergent economic and financial situation of two main groups of countries within the Eurozone, which includes the countries that adopt the euro as their common currency. The divergence was caused by a number of factors, fundamentally stemming from the dissimilar

economic and financial situation of its member countries and from the incomplete institutional architecture and the monetary and fiscal policies in the Eurozone. One Currency, Two Europes: Towards a Dual Eurozone seeks to explore these factors which give rise to the Eurozone's asymmetric composition and the growing difficulties and ineffectiveness that policies meet. It presents evidence to show how the presently incomplete institutional architecture of the Eurozone is the main reason for the extreme detrimental effects of the international crisis and austerity policies, along with the asymmetric economic situation and the insufficient mutual trust demonstrated by the vulnerable as well as resilient countries. Other than presenting a complete overview and analysis of the events that unfolded in the Eurozone as a result of the financial crisis that first emerged in the US, this book also suggests possible solutions which could help to reunify the Eurozone, and make the common currency sustainable and beneficial for all member countries. One Currency, Two Europes will be useful for policymakers who want to learn from the Eurozone's experience with the financial crisis and the importance of complete institutional architectures and inter-country economic convergence. It will also serve as a reference to students and researchers who would like more in-depth analysis of the crisis and the Eurozone's fiscal, monetary and institutional past, present, and future. Readership: Students, researchers and policymakers who are interested in learning more about the fundamental nature and recent developments in the Eurozone and the European Union and the ways that it can respond to its ongoing economic and political challenges. The current political, economic and financial crises facing the EU reveal a deeper cultural, indeed spiritual, malaise – a crisis in ‘the soul of Europe’. Many observers are concluding that the ‘soul of Europe’ cannot be restored to health without a new appreciation of the contribution of religion to its past and future, and especially that of its hugely important but widely neglected Christian heritage, which is alive today even amidst advancing European secularization. This book offers a fresh, constructive and critical understanding of Christian contributions to the origin and development of the EU from a variety of theological and national perspectives. It explains the Christian origins of the EU, documents the various ways in which it has been both affirmed and critiqued from diverse theological perspectives, offers expert, theologically-informed assessments of four illustrative policy areas of the EU (trade, finance, environment, science), and also reports on the place of religion in the EU, including how religious freedom is framed and how contemporary religious (including Muslim) actors relate to EU institutions and vice versa. The book fills a major gap in the current debate about the future of the European project and will be of interest to students and scholars of religion, politics and European studies. This volume focuses on a highly challenging aspect of all European democracies, namely the issue of combining guarantees of judicial independence and mechanisms of judicial accountability. It does so by filling the gap in European scholarship between the two policy sectors of enlargement and judicial cooperation and by taking full stock of an interdisciplinary literature, spanning from comparative politics, socio-legal studies and European studies. *Judicial Accountabilities in New Europe* presents an insightful account of the judicial reforms adopted by new member States to embed the principle of the rule of law in their democratic institutions, along with the guidelines of quality of justice promoted by European institutions in all member States.
