Takes a close-up look at our relationship with Mars, the potential for colonization, and the future of space exploration

When the beautiful Helen is taken away and fall madly in love with Hector of Troy her Greek partner gathers the forces of Greece to fight against the Trojans to get her back. One of the mighty heroes that goes along with the war is the mighty Achilles who manages some great feats in the battle but in the end is cursed by the gods for an act of defilement and dies. After the war, the story switches to the fated Ulysses who mocks the Greek god of the seas and is lost for decades in the waters of the Mediterranean. As he fights with gods and even travels to the realm of the dead to once again return home, his throne is threatened as new suitors seek to claim his wife and his crown back in Greece.

Captain Bullard series chronicles the journey of a young and daring officer until his success as a fleet admiral of space ship. This series seems like a precursor to the modern day space exploration series like Star Trek. This edition includes 9 of his famous deep space adventures: Admiral's Inspection: It was a new trick from ancient history—the Admiral's Inspection. But man, what an inspection that turned out to be! White Mutiny: A rule book skipper in a prize-winning ship is dynamite enough for causing a mutiny! Blockade Runner: Can a good technician make unlikely things turn into highly effective weapons? Bullard Reflects: A

harmless sport turns into a dangerous sport of outlaw busting! Devil's Powder: The drug was getting aboard somehow and making people do peculiar things! Slacker's Paradise: It seemed like a paradise until the commander of a space rowboat found a gigantic enemy battleship that was determined to surrender to him! Brimstone Bill: Bill is a crook, a hell-fire-damnation specialist in the art of collecting cash and amarvellous orator with gadgets. But can Bullard turn him around? The Bureaucrat: Bullard, a Grand Admiral now is caught in a red tape of high position but can he do a small favour to his friend? Orders: The last Bullard Saga. Malcolm Jameson (1891–1945) was an American Golden Age science fiction author whose writing career began when complications of throat cancer limited his activity as a naval officer. Drawing from his experiences of navy and warfare he gave a personal touch to all of his stories.

The most pervasive gods in ancient Rome had no traditional mythology attached to them, nor was their worship organized by elites. Throughout the Roman world, neighborhood street corners, farm boundaries, and household hearths featured small shrines to the beloved lares, a pair of cheerful little dancing gods. These shrines were maintained primarily by ordinary Romans, and often by slaves and freedmen, for whom the lares cult provided a unique public leadership role. In this comprehensive and richly illustrated book, the first to focus on the lares, Harriet

Flower offers a strikingly original account of these gods and a new way of understanding the lived experience of everyday Roman religion. Weaving together a wide range of evidence, Flower sets forth a new interpretation of the much-disputed nature of the lares. She makes the case that they are not spirits of the dead, as many have argued, but rather benevolent protectors—gods of place, especially the household and the neighborhood, and of travel. She examines the rituals honoring the lares, their cult sites, and their iconography, as well as the meaning of the snakes often depicted alongside lares in paintings of gardens. She also looks at Compitalia, a popular midwinter neighborhood festival in honor of the lares, and describes how its politics played a key role in Rome's increasing violence in the 60s and 50s BC, as well as in the efforts of Augustus to reach out to ordinary people living in the city's local neighborhoods. A reconsideration of seemingly humble gods that were central to the religious world of the Romans, this is also the first major account of the full range of lares worship in the homes, neighborhoods, and temples of ancient Rome. One of today's most influential environmentalists tells the fascinating story of his life as a self-made inventor and scientist.

Illustrations Titus Flavius Clemens, known as Clement of Alexandria to distinguish him from the earlier Clement of Rome, was a Christian theologian who taught at the Catechetical School of Alexandria. A convert to Christianity, he was an educated man who was familiar with classical Greek philosophy and literature. As his three major works demonstrate, Clement was influenced by Hellenistic philosophy to a greater extent than any other Christian thinker of his time, and in particular by Plato and the Stoics. His secret works, which exist only in fragments, suggest that he was also familiar with pre-Christian Jewish esotericism and Gnosticism. In one of his works he argued that Greek philosophy had its origin among non-Greeks, claiming that both Plato and Pythagoras were taught by Egyptian scholars. Among his pupils were Origen and Alexander of Jerusalem. Clement is regarded as a Church Father, like Origen. He is venerated as a saint in Coptic Christianity, Ethiopian Christianity and Anglicanism. He was previously revered in the Roman Catholic Church, but his name was removed from the Roman Martyrology in 1586 by Pope Sixtus V on the advice of Baronius.

World myth deciphered and organized into a coherent story of our past. It is almost impossible to read world mythology without noticing common threads and patterns that seem to paint a bigger picture. A story told by our ancient ancestors for future generations to remember and learn. What if the eyewitnesses to past events were taken seriously? What if we listen to their stories with unbiased ears, free of assumptions? What if their stories were backed up by scientific discoveries? What if the myths can explain the mysteries?

of an alien species, or a possible new home for human civilization, our closest planetary neighbor has played a central role in how we think about ourselves in the universe. From Galileo to Kim Stanley Robinson, Robert Crossley traces the history of our fascination with the red planet as it has evolved in literature both fictional and scientific. Crossley focuses specifically on the interplay between scientific discovery and literary invention, exploring how writers throughout the ages have tried to assimilate or resist new planetary knowledge. Covering texts from the 1600s to the present, from the obscure to the classic, Crossley shows how writing about Mars has reflected the desires and social controversies of each era. This astute and elegant study is perfect for science fiction fans and readers of popular science. Ebook Edition Note: The photo of Arthur C. Clarke photo on p. 209 has been redacted.

the new life came not from Earth, now war and peace have new meanings... The sun, Sol, protected mankind for thousands of years and the solar system for millions before that. It was prophesied the Earth would end in 2191. Who knew thirty five years later that prophecy would come true! On that day, Sol reached out to save what planets it could from an attack beyond our imagination. A star, Bane, tore into our backyard bent on snuffing out all traces of our people. We all knew Bane's henchmen planets would ultimately destroy our Earth but it was Sol that held Bane, pulling it from the murderous rampage, to spare Mars. Still the two giants battle in the sky above and now we give thanks to our protective star. Sol, the marvelous ball of gas did what no God has done, actually stepped up to the plate and saved our tiny butts!The Flight of Man... first to Mars, then Saturn..." An anthology of original stories featuring the Edgar Rice Burroughs character John Carter, an Earthman who suddenly finds himself on a strange new world, Mars.
