Steering a middle course between those who argue that a history of Israel can no longer be written because the sources that we have prove inadequate, and what now seems to be the extreme conservatism of the old classic, John Bright's History of Israel, this book presents all the problems and where they cannot be resolved, provides the evidence and leaves the reader with the current situation.

Red Man's America meets the great need for a comprehensive study of Indian societies from the first Stone Age hunters to the American citizens of today. Beginning with the first migrations of primitive man from Siberia in the Old World to Alaska in the New, probably during the latter part of the Pleistocene glaciations, and his subsequent migration southward and eastward, the author takes up in turn the tribes and cultures of the various regions of North America. The material Professor Underhill has gathered from the fields of archaeology, ethnology, and history, together with that drawn from her own experience in the United States Indian Service, produces a fascinating narrative. Red Man's America is an important contribution to our heritage of Indian life and lore. "A work for which both sociologist and historian will be forever grateful. The author has combined a long period of study with actual field work in the service of the Indian to produce a work that gives a brief, but well written and accurate, sketch of the origins, backgrounds, and customs of the various North American tribes. . . . There is no other modern single volume that contains as much information on the subject."—E.R. Vollmar, The Historical Bulletin "Liveliness in style and illustration, together with perspicacity in content, makes this book a useful introduction to the civilization of the original inhabitants of the land."—Pacific Historical Review

The research work based on intensive archaeology field work and exploration data attempts the identity these natural and social productive forces of archaeological settlement of societies in different area and the characteristics features of the ancient settlement at the local and regional contexts. The supremacy of the natural forces has been denied in hid regard.

Beth and Darren are two researchers who are sent to determine the possible value in deserted mines. They have done this a hundred times before, and know they will do it a hundred times again. Or will they? Their innocent trespass into Site 184 is the catalyst to a series of events that is both unexplainable and fascinating. It marks the fierce struggle against time, space and life. . . . a very fine collection of superb articles . . . well written, beautifully researched. --Robert O. Collins . . . an adept, well-rounded and well-organized treatment of Sudan's many obstacles to national development. The book's greatest strengths are drawn from the expertise of its contributors as well as its multidisciplinary approach to complex questions. --MESA Bulletin

Exploring the politics of representation and the cultural changes that occurred in the city, this post colonial study addresses the questions of modernity and space that haunt our perception of Calcutta.

The careers of New York City detective Simon Ziele and his former partner Captain Declan Mulvaney went in remarkably different directions after the tragic death of Ziele's fiancée in the 1904 General Slocum ferry disaster. Although both men were earmarked for much bigger things, Ziele moved to Dobson, a small town north of the city, to escape the violence, and Mulvaney buried himself even deeper, agreeing to head up the precinct in the most crime-ridden area in the city. Yet with all of the detectives and resources at Mulvaney's disposal, a particularly puzzling crime compels him to look for someone he can trust absolutely. When a chorus girl is found dead on a Broadway stage dressed in the leading lady's costume, there are no signs of violence, no cuts, no bruises—no marks at all. If pressed, the coroner would call it a suicide, but then that would make her the second girl to turn up dead in such a manner in the last few weeks. And the news of a possible serial killer would be potentially disastrous to the burgeoning theater world, not to mention the citizens of New York. Following on the heels of Stefanie Pintoff's acclaimed and award-winning debut, A Curtain Falls is a moody and evocative tale that follows Ziele and his partners as they scour the dark streets of early-twentieth-century New York in search of a true fiend.

The hope-filled sequel to the bestselling One Tuesday Morning. In this new novel by Karen Kingsbury, three years have passed since the terrorist attacks on New York City. Jamie Bryan, widow of a firefighter who lost his life on that terrible day, has found meaning in her season of loss by volunteering at St. Paul's, the memorial chapel across the street from where the Twin Towers once stood. Here she meets a daily stream of people touched by the tragedy, including two men with whom she feels a connection. One is a firefighter also changed by the attacks, the other a police officer from Los Angeles. But as Jamie gets to know the police officer, she is stunned to find out that he is the brother of Eric Michaels, the man with the uncanny resemblance to Jamie's husband, the man who lived with her for three months after September 11. Eric is the man she has vowed never to see again. Certain she could not share even a friendship with his brother, Jamie shuts out the police officer and delves deeper into her work at St. Paul's. Now it will take the persistence of a tenacious man, the questions from her curious young daughter, and the words from her dead husband's journal to move Jamie beyond one Tuesday morning. "Jamie Bryan took her position at the far end of the Staten Island Ferry, pressed her body against the railing, eyes on the place where the Twin Towers once stood. She could face it now, every day if she had to. The terrorist attacks had happened, the World Trade Center had collapsed, and the only man she'd ever loved had gone down with them. Late fall was warmer than usual, and the breeze across the water washed over Jamie's face. If she could do this, if she could make this journey three times a week while Sierra was in school, then she could

convince herself to get through another long, dark night. She could face the empty place in the bed beside her, face the longing for the man who had been her best friend, the one she'd fallen for when she was only a girl."

This is a practical guide by specialists within fields of oesophageal disease management, with detailed yet concise chapters that collectively review current thought and practice. The book has been produced in a 'How do I do it?' format that highlights contentious issues and places emphasis on the practicalities of disease management. The practical approach is complemented graphically by the use of images and technical illustrations in full colour, and each chapter concludes with a listing of key points to be learnt.

Since its first publication in the USA in 1957, Thy Word is Truth has been recognized as the classic popular exposition of the biblical doctrine of inspiration. This book explains the importance of the doctrine of biblical inspiration. Without it the reliability of the Bible is in serious doubt, the integrity of Jesus is put in question, and the only final authority men have in matters of faith becomes their own conscience. If we cannot trust what scripture says about itself, how can we trust what it says about God, about man's need, or about Christ's saving power? Furthermore, Thy Word is Truth explains why this doctrine has been so fiercely contested. It is precisely because it lies at the heart of Christianity. - Back cover.

Chemicals used within the aquaculture industry are identified and, for each chemical, a brief summary of information is provided, when available, on its intended purpose, scale of application, the aquacultural sectors and geographic locations of principal use and potential impacts on the environment and human health. Environmental issues arising from the properties of aquacultural chemicals are discussed. The use of most chemicals in aquaculture, if carried out properly, can be regarded as wholly beneficial with no attendant adverse environmental effects or increased risks to the health of aquacultural workers. Concerns appear warranted, however, regarding the over-use and misuse of certain chemicals for which proper risk assessments with respect to the marine environment have not been conducted. A further legitimate concern and a barrier to conducting an exhaustive review of these practices is the lack of availability of quantitative data on contemporary chemical use in the aquaculture industry. The viability of contemporary aquaculture is contingent on the use of chemicals. Accordingly, while the overriding consideration should be minimizing the quantities of chemicals applied, most current uses of chemicals are essential. Recognising that chemotherapeutants and pesticides in current use are of varying effectiveness and hazard, recommendations are provided to promote the safe and effective use of chemicals in coastal aquaculture. Governmental authorities, the scientific community and the aquacultural and pharmaceutical industries all have important roles to play to ensure that chemical use is consistent with protection of environmental quality and human health. In particular, mechanisms need to be put in place and enforced for the registration and control of aquacultural chemicals to protect the environment and human health and to ensure the sustainable growth of the aquaculture industry. This study analyses the various types and stages of conflict that have been experienced by diverse groups and generations of Karen over the six decades of armed conflict between the Karen National Union (KNU) and successive Burmese governments. Instead of focusing on those who are internally displaced, those in the refugee camps on the Thai-Burma border or living abroad, or those in the KNU, it places particular emphasis on the "other" Karen, or the majority segment of the Karen population living inside Burma, a population that has hitherto received little scholarly and journalistic attention. It also assesses the Karen people's varied attitudes toward a number of political organizations that claim to represent their interests, toward successive Burmese military regimes, and toward the political issues that led to the original divide between "accommodators" and "rebels." This study argues that the lifestyles and strategies that the Karens have pursued are diverse and not confined to armed resistance. Acknowledging these multiple voices will not only shed light upon the many positive features of ethnic interactions, including harmonious communal relationships and significant attempts to promote peace and stability by encouraging "normal" activities and routines in both peaceful and war-torn areas; it will also help to identify policy recommendations for future ceasefire negotiations and a possible long-term political settlement within the context of a militarized Burma.

Winner of the 2012 Philip K. Dick Award Theorem: Petrovitch has a lot of secrets. Proof: Secrets like how to make anti-gravity for one. For another, he's keeping a sentient computer program on a secret server farm - the same program that nearly destroyed the Metrozone a few months back. Theorem: The city is broken. Proof: The people of the OutZone want what citizens of the Metrozone have. And then burn it to

the ground. Now, with the heart of the city destroyed by the New Machine Jihad, the Outies finally see their chance. Theorem: These events are not unconnected. Proof: Someone is trying to kill Petrovitch and they're willing to sink the whole city to do it.

Life is hectic enough for suburban single mom Jane Jeffrey this Christmas season--what with her having to survive cutthroat church bazaar politics and finish knitting the afghan from Hell at the same time. The last thing the harried homemaker needs is an unwelcome visit from old acquaintance Phyllis Wagner and her ill-mannered brat of a teenage son. And the Wagner picture becomes even more complicated when a dead body is woven into the design. Solving a murder, however, is a lot more interesting than knitting, so Jane's determined to sew the whole thing up. But with a plethora of suspects and the appearance of a second corpse, this deadly tapestry is getting quite complex indeed. And Jane has to be very careful not to get strangled herself by the twisted threads she's attempting to unravel.

Following the stranding of a Soviet Whiskey-class submarine in 1981 on the Swedish archipelago, a series of massive submarine intrusions took place within Swedish waters. However, the evidence for these appears to have been manipulated or simply invented. Classified documents and interviews point to covert Western, rather than Soviet activity. This is backed up by former US Secretary of Defense Caspar Weinberger, who stated that Western "testing" operations were carried out regularly in Swedish waters. Royal Navy submarine captains have also admitted to top-secret operations. Ola Tunander's revelations make it clear that the United States and Britain ran a "secret war" in Swedish waters. The number of Swedes perceiving the Soviet Union as a direct threat increased from 5-10 per cent in 1980 to 45 per cent in 1983. This Anglo-American "secret war" was aimed at exerting political influence over Sweden. It was a risky enterprise, but perhaps the most successful covert operation of the entire Cold War.

Rita Williams-Garcia's masterful and bold Coretta Scott King Honor Book is just as fresh, funny, and powerfully relevant today as when it was first published. It is now being reissued with a beautiful, contemporary new cover! When fourteen-year-old Gayle gets in trouble with a boy—again—her mother doesn't give her a choice: Gayle is getting sent away from New York to her family down South, along with her baby, José. In a small town in Georgia, there is nowhere to go but church, nothing to do but chores, and no friends except her goody-goody, big-boned, kneesock-wearing cousin, Cookie. Gayle is stuck cleaning up after Great, the old family matriarch who stays upstairs in her bed. But the more she spends time with Cookie and Great, Gayle learns about her family's history and secrets, stretching all the way back through the preachers and ancestors of the past. And slowly, the stories of her roots begin to change how Gayle sees her future. Rediscover this novel by a master storyteller and Newbery Honor-winning author, about one girl's discovery of her own African American family history—and her own place within it.

This reader "presents students with the original words of speeches and testimony, political and legal writings, and literature that have reflected, precipitated, and implemented pivotal events of the past four centuries"--Preface.

Questions of morality in exploring alternate realities; goddesses of old, living in modern-day Philippine society; the flesh trade in a dystopic future; four childhood friends, taunting fate by crossing the line between life and death, and coming back again; a world where Justice is immediate, absolute, and therefore deemed perfect--these are but some of the ideas to have sprung from the mind of up-and-coming writer Eliza Victoria. In *A Bottle of Storm Clouds*, Victoria's first compilation of short fiction, her subjects are a mottled bunch; her characters, of all walks of life; her approaches, from all directions. But her stories all boil down to one question: "e;What if?"e;

Nothing is more central to Christian thought, or has been from the beginning, than the belief that God has revealed Himself, His mind, and His will to man. The ideal of revelation continues to present its challenge in men's lives; and the great philosophers, no less than the community of believers, have wrestled with it. Dr. John Baillie reminds us that the question has not always been thought difficult, that throughout the greater part of Christian history any intelligent schoolboy could have stated the meaning of revelation in terms not contradictory to the formulation of it by St. Thomas Aquinas. The value of this small book can hardly be exaggerated. While Dr. Baillie carefully compares and summarizes the positions of modern theologians, his main concern is with the impact of revelation in men's lives. The wisdom, the sincerity, and objectivity with which he approaches his subject make this a truly distinguished contribution to the theological literature addressed to a general reader.
