The JCT standard forms of building contract require a thorough understanding of their procedural requirements, as well as their legal implications. They require both the contractor and the architect, on behalf of the employer, to send a wide range of notices and letters if each party is to protect its legitimate interests. The main contract forms are also supported by complex sub-contract documentation. Therefore, it is not surprising that when this book of specimen letters, notices and forms was first published, it was widely welcomed by the construction industry. The book provides examples of documentation likely to be required for a contract under the following JCT forms: ? the Standard Form of Building Contract ? the Intermediate Form of Building Contract ? the Agreement for Minor Building Works ? the Standard Form of Building Contract With Contractor's Design It includes a commentary on the practical implications of the various documents and highlights the points to be watched. The new edition takes into account the wide range of amendments to the latest editions of the standard forms following the Housing Grants, Construction and Regeneration Act 1996, and in particular, the new payment and adjudication provisions. For the first time it features documentation for use with the JCT design and build form.

You are holding the first in a hopefully long and successful series of RSA Cryptographers' Track proceedings. The Cryptographers' Track (CT-RSA) is one of the many parallel tracks of the yearly RSA Conference. Other sessions deal with government projects, law and policy issues, freedom and privacy news, analysts' opinions, standards, ASPs, biotech and healthcare, finance, telecom and wireless security, developers, new products, implementers, threats, RSA products, VPNs, as well as cryptography and enterprise tutorials. RSA Conference 2001 is expected to continue the tradition and remain the largest computer security event ever staged: 250 vendors, 10,000 visitors and 3,000 class-going attendees are expected in San Francisco next year. I am very grateful to the 22 members of the program committee for their hard work. The program committee received 65 submissions (one of which was later withdrawn) for which review was conducted electronically; almost all papers had at least two reviews although most had three or more. Eventually, we accepted the 33 papers that appear in these proceedings. Revisions were not checked on their scientific aspects and some authors will write final versions of their papers for publication in refereed journals. As is usual, authors bear full scientific and paternity responsibilities for the contents of their papers.
