Most of Chester Barnard's career was spent in executive practice. A Mount Hermon and Harvard education, cut off short of the bachelor's degree, was followed by nearly forty years in the American Telephone & Telegraph Company. His career began in the Statistical Department, took him to technical expertness in the economics of rates and administrative experience in the management of commercial operations, and culminated in the presidency of the New Jersey Bell Telephone Company. He was not directly involved in the Western Electric experiments conducted chiefly at the Hawthorne plant in Cicero, but his association with Elton Mayo and the latter's colleagues at the Harvard Business School had an important bearing on his most original ideas. Barnard's executive experience at AT&T was paralleled and followed by a career in public service unusual in his own time and hardly routine today. He was at various times president of the United Services Organization (the USO of World War II), head of the General Education Board and later president of the Rockefeller Foundation (after Raymond Fosdick and before Dean Rusk), chairman of the National Science Foundation, an assistant to the Secretary of the Treasury, a consultant to the American representative in the United Nations Atomic Energy Committee, to name only some of his public interests. He was a director of a number of companies, a fellow of the American Association for the Advancement of Science and of the American Academy of Arts and Sciences. He was a lover of music and a founder of the Bach Society of New Jersey.

The Spirit of Islam is considered one of the best and most well-written sources of information on the life of Mohammed the prophet and the history of Islam. Consisting of two parts, "The Life and Ministry of the Prophet" and "The Spirit of Islam," the book contains the literary, cultural, social, political, and philosophical history of Islam. Originally, the book was a short work entitled "A Critical Examination of the Life and Teachings of Mohammad," but the author later revised the work into what it is today. SYED AMEER ALI (1849-1928) was an Indian Muslim who wrote several books about Islamic history and practice, as well as Islamic law. A respected jurist himself, and a descendant of Mohammad, Ali's words were extremely influential. He achieved honors in school, began a legal practice in Calcutta, and was one of the most accomplished Muslims of his time before he moved to London at age 20. When he returned to Calcutta in 1873, he continued his law practice, became a law professor at Calcutta University, and founded the Central National Mohammedan Association in 1877, a political organization central to promoting modern Muslim thought. Ali moved back to London in 1904, establishing the London Muslim League in 1908 and the first London mosque in 1910. Ali continued to write and make breakthroughs for Muslims until his death in 1928.
