This book is a concise learning guide dedicated to the full scope of pediatric history-taking and clinical examination, for use in OSCEs as well as clinical life. It guides the reader simply and methodically through what to ask when taking a history, and how to perform a comprehensive physical examination. The book contains more than 30 “History Stations” covering the most common pediatric cases, as well as 10 “Examination Stations” covering examinations of the different body system. It provides students and resident doctors worldwide with the necessary core information for pediatric history-taking and clinical examination, all in a brief and interesting format. The book adopts a reader-friendly format through a lecture-note style and the use of Key Points, Clinical Tips, Notes, Tables, and Boxes listing the most important features. It is also richly illustrated, demonstrating the correct way to perform clinical examinations. Written “by a resident, for residents and medical students,” this book has been revised, foreworded, and peer-reviewed by fourteen prominent authorities in the field of Pediatrics from various parts of the world (including the United States, United Kingdom, Australia, Italy, Canada, and India), and from different universities (Illinois, Pennsylvania, Washington, Oxford, Edinburgh, Keele,

Rev. ed. of: Raj's practical management of pain / [edited by] Honorio T. Benzon ... [et al.]. 4th ed. 2008.

This book is a comprehensive compendium on the medical and surgical treatment of chronic rhinosinusitis (CRS), with or without polyposis. Detailed coverage is provided of a wide range of topics, including medical and surgical management of CRS and its subsets, medical therapy in the pre- and postoperative period and specific medical therapeutic classes currently employed in CRS patients. Each chapter highlights key aspects of specific therapies, including mechanism of action, indications, dosages, side-effects and available clinical efficacy data and emphasizes practical management pearls and pitfalls. Operative techniques for endoscopic sinonasal procedures for CRS are also outlined. The book will be a valuable resource for practicing general otolaryngologists, rhinologists and allergists as well as residents and fellows in training. It will also serve as a reference guide for physician assistants, nurse practitioners and nurses involved in the care of CRS patients.

This Encyclopedia of Biotechnology is a component of the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. Biotechnology draws on the pure biological sciences (genetics, animal cell culture, molecular biology, microbiology, biochemistry, embryology, cell biology) and in many instances is also dependent on knowledge and methods from outside the sphere of biology (chemical engineering, bioprocess engineering, information technology, biorobotics). This 15-volume set contains several chapters, each of size 5000-30000 words, with perspectives, applications and extensive illustrations. It carries state-of-the-art knowledge in the field and is aimed, by virtue of the several applications, at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers and NGOs.

A favorite among residents and pulmonary fellows, this text provides all the information needed to evaluate and manage respiratory diseases and critically ill patients and to pass the American Board of Internal Medicine's subspecialty exam in pulmonary medicine. The Fifth Edition includes new information on ARDS, sedation of critically ill patients, rehabilitation for COPD, care of elderly patients, genetic testing for asthma, CTA and other diagnostic techniques for pulmonary thromboembolism, new antifungal drugs without renal toxicity, new treatment guidelines for pneumothorax, and ventilators and noninvasive ventilation for respiratory failure. This edition also includes more algorithms and differential diagnosis tables.
