Homeopathy is over 200 years old and is still experiencing an uninterrupted influx of new practitioners and patients. Many patients and therapists swear by this "alternative healing method", which in some countries is even financed by health insurances. This seems completely incomprehensible to critics: For them it is clearly evident that homeopathy is hopelessly unscientific and has at best a placebo effect. The positions of supporters and opponents seem to be just as immutable as they are incompatible. This book answers some essential and fascinating questions: What remains of the founding ideas of homeopathy in 21st century medicine? Does it really work and, if so, how? Which of the original theories can we still apply today with a clear conscience and use for the benefit of patients and the healthcare system? Where does homeopathy have its limits and does it indeed need to be critically reconsidered and evaluated? The author has dealt with the points of criticism for years, but at the same time also takes seriously the wishes and concerns of patients who often feel insufficiently cared for by conventional medical practice. Against the background of her own personal history, her book attempts to bridge the gap between these two traditionally opposing camps.

David S. Riley's interest in the history, methodology and results of homeopathic drug provings began with his exposure to homeopathy in 1988 and his later study at the Hahnemann College of Homeopathy in Albany, California. The homeopathic drug provings published here are the result of his investigation of the research methods associated with homeopathic drug provings and contemporary research methodology. Dr. Riley has developed explicit and transparent research tools for (1) symptom selection criteria, (2) electronic data collection, and (3) blinding to reduce bias. These homeopathic drug provings follow good clinical practice research guidelines (GCP) and incorporate the guidelines suggested by Dr. Samuel Hahnemann more than 200 years ago

Dr Dorothy Shepherd had wide experience both in Harley Street and in clinics in the poorer parts of London. Although she had leanings towards Homeopathy during her student years, it was not until she visited the world-famous Dr J. T. Kent in the USA, and experienced great benefit from this therapy that she fully adopted this method of treatment in her practice. Having embarked upon a career as a Homeopath she studied the subject deeply and the more she learned the more she became convinced that it is the finest method of dealing with every type of ailment. Being a true healer she believed that every sufferer should know of Homeopathy and in order to make it more widely known she wrote *Homeopathy for the First Aider* which gives simple instructions for the treatment of injuries and common ailments. This book was an immediate success and she then decided to record her experiences in dealing with more serious illness and this book, *The Magic of the Minimum Dose* followed.

Put acne in your rearview mirror, once and for all. For those of us who have struggled with chronic acne, we know that these irritating bumps don't just mess with our skin and appearance. They also curse at us every day, affecting our confidence and self-image. When you look in the mirror, you may hear the words acne uses: It throws out insults and belittling messages, and it tells us not to bother trying to make our skin better. It says just give up. At the same time, acne also demands that we drop everything we're doing and give it constant attention. This four-

letter word is a bully, not just a diagnosis and physical skin condition the way we're taught to think by mainstream medicine and the skin care industry. To truly defeat acne once and for all, both the mind and body have to get involved. We need a better approach to treating acne than simply face washes, creams, supplements, pharmaceuticals, and dietary changes. These methods don't address the bullying tactics acne uses to try and control our lives, so they don't tend to be long-term solutions. Acne often just bulldozes over these efforts, costing us the money and time we spend on trying to fix our skin, and leaving us frustrated. Well, now there's a way to talk and fight back. You don't have to sit there silently while acne tries to take away what's yours, including your skin and your life. You can start recognizing the false messages that this four-letter word is sending you and separate your identity from them, reclaiming your skin in the process. You can stand up for yourself in the face of acne and refuse to revolve your life around it. Acne: Just Another Four-Letter Word shows you how to do just that. Dr Chauhan has taken a lot of pains and given considerable thinking to produce this book. The book contains pictures to express the symptoms of the disease to enable the homeopath to understand the same. The pictures have been drawn well. If the students see the pictures, they will not miss the symptom of the ailment and in homeopathy the understanding of the ailment and in homeopathy the understanding of symptoms is very important. Any student seeing the pictures in the book will not forget the character of the disease indicated by it and for them this is very essential.
