The French painter Gustave Moreau (1826-1898) strove to renew figure painting by creating an unacademic form of 'epic' art. In this book, Peter Cooke explains how Moreau effectively created pictorial Symbolism through his novel approach to the genre of history painting. In the process, the author examines the artist through a number of his major paintings, his ideology and aesthetic, and in relation to other artists of his time and of the previous generations. The narrative follows Moreau's career from his Neoclassical and academic training through his conversion to Romanticism, his studies in Italy, his experiences as an exhibitor at the Paris Salon, between 1864 and 1880, and his subsequent years as a professor at the Ecole des Beaux-Arts and as the founder of his own museum. By examining Moreau's critical reception, as well as that of his students, the book shows his controversial effect on the art world of his time, during the Second Empire and Third Republic. Drawing on unpublished manuscripts from the Musée Gustave Moreau in Paris, Cooke presents insights into how Moreau's complex and original art reflects his spiritualist ideology, together with his persistent inner obsessions.

The story is presented through the eye of an immigrant returning home for a fortnight to a little coastal Italian town from the Americas, with the intent of taking a break from customary life and reorganising his thoughts around lifelong problems with his wife. There old memories emerge and blend with the current life of the town. During his stay, the visitor learns from a group of wise old men that a friend of his youth has died of Aids after conducting a dissipated life. The old men also represent the heart of the little village with their provincial wisdom.

At last, the brilliant successor to Hammett and Chandler in a definitive collector's edition: Revered by such contemporary masters as Sue Grafton, George Pelecanos, and James Ellroy, Ross Macdonald (the pseudonym of Kenneth Millar) brought to the crime novel new levels of social realism and psychological depth, while honing a unique gift for intricately involving mystery narratives. For his centennial year, The Library of America inaugurates its Macdonald edition with four novels from the 1950s, all featuring his incomparable protagonist, private investigator Lew Archer. Here are *The Way Some People Die*, a twisted journey through Los Angeles high and low, *The Barbarous Coast*, an exploration of crime and corruption in the movie business, *The Doomsters*, a breakthrough novel of madness and self-destruction, and *The Galton Case*, the mythically charged and deeply personal book that Macdonald considered a turning point in his career. As a special feature, this volume also includes five pieces in which Macdonald reveals the autobiographical background of his books and describes his distinctive approach to crime writing. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing, and keeping permanently in print, America's best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

Frank "Dolly" Dillon has a job he hates, working sales and collections for Pay-E-Zee Stores, a wife named Joyce he can't stand, and an account balance that barely allows him to pay the bills each month. Working door-to-door one day, trying to eke money out of folk with even less of it than he has, Dolly crosses paths with a beautiful young woman named Mona Farrell.

Mona's being forced by her aunt to do things she doesn't like, with men she doesn't know -- she wants out, any way she can get it. And to a man who wants nothing of what he has, Mona sure looks like something he actually does. Soon Dolly and Mona find themselves involved in a scheme of robbery, murder and mayhem that makes Dolly's blood run cold. As Dolly's plans begin to unravel, his mind soon follows. In *A Hell of a Woman*, Jim Thompson offers another arresting portrait of a deviant mind, in an ambitious crime novel that ranks among his best work.

The book presents a unified and self-sufficient and reader-friendly introduction to the anisotropic elasticity theory necessary to model a wide range of point, line, planar and volume type crystal defects (e.g., vacancies, dislocations, interfaces, inhomogeneities and inclusions). The necessary elasticity theory is first developed along with basic methods for obtaining solutions. This is followed by a detailed treatment of each defect type. Included are analyses of their elastic fields and energies, their interactions with imposed stresses and image stresses, and the interactions that occur between them, all employing the basic methods introduced earlier. All results are derived in full with intermediate steps shown, and "it can be shown" is avoided. A particular effort is made to describe and compare different methods of solving important problems. Numerous exercises (with solutions) are provided to strengthen the reader's understanding and extend the immediate text. In the 2nd edition an additional chapter has been added which treats the important topic of the self-forces that are experienced by defects that are extended in more than one dimension. A considerable number of exercises have been added which expand the scope of the book and furnish further insights. Numerous sections of the book have been rewritten to provide additional clarity and scope. The major aim of the book is to provide, in one place, a unique and complete introduction to the anisotropic theory of elasticity for defects written in a manner suitable for both students and professionals. *TINY FOOTCRUNCH* is the debut poetry collection from David Wasserman. Born out of emotions and sharpened by society's waning attention span, it delivers vast thoughts through tiny poems.

Lew Archer returns in this gripping mystery, widely recognized as one of acclaimed mystery writer Ross Macdonald's very best, about the search for the long lost heir of the wealthy Galton family. Almost twenty years have passed since Anthony Galton disappeared, along with a suspiciously streetwise bride and several thousand dollars of his family's fortune. Now Anthony's mother wants him back and has hired Lew Archer to find him. What turns up is a headless skeleton, a boy who claims to be Galton's son, and a con game whose stakes are so high that someone is still willing to kill for them. Devious and poetic, *The Galton Case* displays MacDonald at the pinnacle of his form. Precocious and shocking when first published in 1956, *Chocolates for Breakfast* is a candid coming-of-age story of a young girl's sudden awakening to love and desire written by 18-year-old Pamela Moore. Disaffected, sexually precocious 15-year-old Courtney Farrell splits her time between her parents' homes in New York and Los Angeles. When a crush on a female teacher in boarding school ends badly, Courtney sets out to know everything fast—from tasting dry martinis to engaging in a passionate love affair with an older man. Considered an American response to French sensation *Bonjour Tristesse*, *Chocolates for Breakfast* is also a tale of Courtney's close and ultimately tragic friendship with her roommate, Janet Parker, and a moving account of how teenagers approach love and sex for the first time. This edition of *Chocolates for Breakfast* features 16 pages of insights into the book, including author interviews, recommended reading, and more.

Developing skills and competency in CBT is a complex process of which self-observation and self-reflection are an essential part. In this new book, leading figures Beverly Haarhoff and Richard Thwaites outline the rationale for a focus on self-reflective practice in CBT, before offering practical and accessible guidelines demonstrating how this can be achieved in training and practice. Highlighting relevant research throughout and using case studies to illustrate theory in practice, ten chapters consider: - reflection in training and in supervision and self-supervision, - reflecting on the therapeutic relationship, on our sociocultural perceptions and biases and on client feedback - how reflection is vital to self-care and to becoming a better therapist, supervisor and trainer. This is an essential read for trainees in both high and low intensity CBT programmes, those on broader CBT courses, and for qualified practitioners working independently to enhance their self-reflective capacity.
