Human induced development activities are introduced with insufficient attention to their consequences for our living environment, even in cases where environmental assessments have been carried out. This apparent lack of attention to biodiversity in environmental assessment is rooted in the difficulties we have in adequately addressing biodiversity within the scope, time frame and budget allocated for assessments. This book provides a conceptual background and practical approaches to overcome these difficulties. It integrates the objectives of the Convention on Biological Diversity, its ecosystem approach, and the conceptual framework of the Millennium Ecosystem Assessment into a comprehensive approach to biodiversity in environmental assessment. It highlights the need to consider the value of biodiversity based on its use by each stakeholder, addresses the importance of both social and economic development to reach the Millennium Development Goals, and provides insights into ways to balance present and future needs.

Health Sciences Literature Review Made Easy: The Matrix Method, Fifth Edition describes the practical and useful methods for reviewing scientific literature in the health sciences. A sourcebook of exercises, games, scenarios and role plays, this practical, user-friendly guide provides a complete and valuable resource for research methods tutors, teachers and lecturers. Developed to complement and enhance existing course materials, the 100 ready-to-use activities encourage innovative and engaging classroom practice in seven areas: finding and using sources of information planning a research project conducting research using and analyzing data disseminating results acting ethically developing deeper research skills. Each of the activities is divided into a section on tutor notes and student handouts. Tutor notes contain clear guidance about the purpose, level and type of activity, along with a range of discussion notes that signpost key issues and research insights. Important terms, related activities and further reading suggestions are also included. Not only does the A4 format make the student handouts easy to photocopy, they are also available to download and print directly from the book's companion website for easy distribution in class.

This book is a step-by-step guide for instructors on how to teach a psychology research methods course at the undergraduate or graduate level. It provides various approaches for teaching the course including lecture topics, difficult concepts for students, sample labs, test questions, syllabus guides and policies, as well as a detailed description of the requirements for the final experimental paper. This book is also supplemented with anecdotes from the author's years of experience teaching research methods classes. Chapters in this book include information on how to deliver more effective lectures, issues you may encounter with students, examples of weekly labs, tips for teaching research methods online, and much more. This book is targeted towards the undergraduate or graduate professor who has either not yet taught research methods or who wants to improve his or her course. Using step by step directions, any teacher will be able to follow the guidelines found in this book that will help them succeed. How to Teach a Course in Research Methods for Psychology Students is a valuable resource for anyone teaching a quantitative research methods course at the college or university level.

Employing numerous examples of classic British design, Designing Modern Britain delves into the history of British design culture, and thereby tracks the evolution of the British national identity.

Health Sciences Literature Review Made Easy helps students and practitioners better understand scientific literature by instilling the essential skills (via the matrix method) needed to critically evaluate article findings. The fundamental principles of searching, organizing, reviewing, and synthesizing are covered at the most basic level. Visual examples and a single case study are woven throughout the text. This easy-to-read and practical reference is an invaluable aid to students, researchers, and practitioners. The Third Edition has been completely revised and updated to reflect the switch out of "paper" mode and into electronic mode. Clinical practice examples and references to PubMed and PubMed Central have been added throughout along with information on reference management softwares such as endnote and refworks.

This book constitutes the thoroughly refereed proceedings of the 13th International Conference on Metadata and Semantic Research, MTSR 2019, held in Rome, Italy, in October 2019. The 27 full and 15 short papers presented were carefully reviewed and selected from 96 submissions. The papers are organized in the following tracks: metadata and semantics for digital libraries, information retrieval, big, linked, social and open data; metadata and semantics for agriculture, food, and environment; digital humanities and digital curation; cultural collections and applications; european and national projects; metadata, identifiers and semantics in decentralized applications, blockchains and P2P systems.

Incidents of bioterrorism and biowarfare are likely to recur, leading to increased public concern and government action. The deficiencies of the Biological and Toxin Weapons Convention (BTWC) are in urgent need of attention: the BTWC is the central international agreement to prevent the proliferation of biological warfare programmes. Uniquely, this book is written by diplomats involved in the decade-long effort (1991-2001) in which State Parties to the BTWC tried to agree a Protocol to the Convention with legally binding measures to strengthen its effectiveness, and academics concerned with the negotiations. Just before negotiations foundered, when the Chairman's proposed text was virtually complete, the problems and proposed solutions were examined thoroughly, leading to this book. The book is wide-ranging in its review of the history of biological warfare, the reasons why the current biological revolution is of such concern, and the main features of the BTWC itself. The core of the book examines the key elements of the proposed protocol - declarations, visits, challenge-type investigations, and enhanced international cooperation - and the implications for government, industry and biodefence, giving us all a better understanding of what still remains to be done to avert a biowarfare catastrophe.

The surprising, magnificent story of a Panamanian government employee who, one day, after a series of troubles, writes the celebrated masterwork of modern Central American poetry. Unmistakably the work of César Aira, Varamo is about the day in the life of a hapless government employee who, after wandering around all night after being paid by the

Ministry in counterfeit money, eventually writes the most celebrated masterwork of modern Central American poetry, The Song of the Virgin Boy. What is odd is that, at fifty years old, Varamo "hadn't previously written one sole verse, nor had it ever occurred to him to write one." Among other things, this novella is an ironic allegory of the poet's vocation and inspiration, the subtlety of artistic genius, and our need to give literature an historic, national, psychological, and aesthetic context. But Aira goes further still — converting the ironic allegory into a formidable parody of the expectations that all narrative texts generate — by laying out the pathos of a man who between one night and the following morning is touched by genius. Once again Aira surprises us with his unclassifiable fiction: original and enjoyable, worthy of many a thoughtful chuckle, Varamo invites the reader to become an accomplice in the author's irresistible game.

Orthopedic experts in their field have carefully chosen what they consider to be the key papers in their respective domains. Every paper is carefully described and evaluated by its strengths, weaknesses and its contribution to the field. Papers have been chosen by number of citations, academic importance, articles that have changed our whole way of thinking or that have simply stood the test of time.

Every industry will be positively affected by blockchain and AI technology at some point. However, blockchain is a misunderstood technology within the publishing realm. The scholarly publishing industry can significantly improve the flow of research, drive down costs, and introduce new efficiencies in the publishing industry with these new technologies. The scholarly publishing industry is in its early days of the digital transformation, and blockchain and AI technology could play a major role in this. However, the industry has been resistant to change. These reasons include but are not limited to staying with legacy systems, cost of new platforms, changing cultures, and understanding and adopting new technologies. With proper research and information provided, the publishing industry can adopt these technologies for beneficial advancements and the generation of a bright future. Transforming Scholarly Publishing With Blockchain Technologies and AI explores the changing landscape of scholarly publishing and how blockchain technologies and AI are slowly being integrated and used within the industry. This book covers both the benefits and challenges of implementing technology and provides both cases and new developments. Topics highlighted include business model developments, new efficiencies in scholarly publishing, blockchain in research libraries, knowledge discovery, and blockchain in academic publishing. This book is a valuable reference tool for publishers, IT specialists, technologists, publishing vendors, researchers, academicians, and students who are interested in how blockchain technologies and AI are transforming and developing a modern scholarly publishing industry.

This book contains the thoroughly refereed and revised best papers from the 7th International Conference on Web Information Systems and Technologies, WEBIST 2011, held in Nordwijkerhout, The Netherlands, in May 2011, organized by the Institute for Systems and Technologies of Information, Control and Communication (INSTICC), in collaboration with ACM SIGMIS and co-sponsored by the Workflow Management Coalition (WFMC). The 12 papers presented in this book were carefully reviewed and selected from 156 submissions. The papers are grouped into tow parts on "Internet Technology" and "Web Interfaces and Applications". In addition, the three invited presentations are also included.

The two-volume set of LNCS 10941 and 10942 constitutes the proceedings of the 9th International Conference on Advances in Swarm Intelligence, ICSI 2018, held in Shanghai, China, in June 2018. The total of 113 papers presented in these volumes was carefully reviewed and selected from 197 submissions. The papers were organized in topical sections namely: multi-agent systems; swarm robotics; fuzzy logic approaches; planning and routing problems; recommendation in social media; predication; classification; finding patterns; image enhancement; deep learning; theories and models of swarm intelligence; ant colony optimization; particle swarm optimization; artificial bee colony algorithms; genetic algorithms; differential evolution; fireworks algorithm; bacterial foraging optimization; artificial immune system; hydrologic cycle optimization; other swarm-based optimization algorithms; hybrid optimization algorithms; multi-objective optimization; large-scale global optimization.

For nearly two decades, the Public Library Associations Results Series has been the definitive resource for practical everyday management. This latest addition to the series offers tips to help determine which activities effectively support goals and objectives; 14 easy to follow tasks; and the tools needed for staff to prepare and effectively communicate change.

Students can easily misstep when they first begin to do research. Leanne C. Powner's new title Empirical Research and Writing: A Student?s Practical Guide provides valuable advice and guidance on conducting and writing about empirical research. Chapter by chapter, students are guided through the key steps in the research process. Written in a lively and engaging manner and with a dose of humor, this practical text shows students exactly how to choose a research topic, conduct a literature review, make research design decisions, collect and analyze data, and then write up and present the results. The book?s approachable style and just-in-time information delivery make it a text students will want to read, and its wide-ranging and surprisingly sophisticated coverage will make it an important resource for their later coursework.

A reissue of Rimbaud's highly influential work, with a new preface by Patti Smith and the original 1945 New Directions cover design by Alvin lustig. New Directions is pleased to announce the relaunch of the long-celebrated bi- lingual edition of Rimbaud's A Season In Hell & The Drunken Boat — a personal poem of damnation as well as a plea to be released from "the examination of his own depths." Rimbaud originally distributed A Season In Hell to friends as a self-published booklet, and soon afterward, at the age of nineteen, quit poetry altogether. New Directions's edition was among the first to be published in the U.S., and it quickly became a classic. Rimbaud's famous poem "The Drunken Boat" was subsequently added to the first paperbook printing. Allen Ginsberg proclaimed Arthur Rimbaud as "the first punk" — a visionary mentor to the Beats for both his recklessness and his fiery poetry. This new edition proudly dons the original Alvin Lustig–designed cover, and a introduction by another famous rebel — and now National Book Award–winner — Patti Smith.

This four-volume-set (CCIS 208, 209, 210, 211) constitutes the refereed proceedings of the International Symposium on Applied Economics, Business and Development, ISAEBD 2011, held in Dalian, China, in August 2011. The papers address issues related to Applied Economics, Business and Development and cover various research areas including Economics, Management, Education and its Applications.

A good research paper is more than just a clear, concise, scientific expose. It is a document that needs to go beyond the science to attract attention. There are both strict and less definable norms for doing this, but many authors are unaware as to what they are or their use. Publishing is rapidly changing, and needs to be explained with a fresh perspective. Simply writing good, clear, concise, science is no longer enough-there is a different mind-set now required that students need to adopt if they are to succeed. The purpose of this book is to provide the foundations of this new approach for both young scientists at the start of their careers, as well as for more experienced scientists to teach the younger generation. Most importantly, the book will make the reader think in a fresh, creative, and novel way about writing and publishing science. This is an introductory guide suitable for advanced undergraduates, graduate students, and professional researchers in both the life and physical sciences.

This book is a guide to scholarly research in the field of American postmodern literature, defined as the period between 1950 and 1990 and provide advanced undergraduate students, graduate students, and scholars of literature with a comprehensive view of the print and online resources available in literature and related subject areas

The critically acclaimed final masterwork of John Gardner: an American novel haunted with macabre and cerebral elements.

This book constitutes the proceedings of the 6th International Conference on Web Information Systems Engineering, WISE 2005, held in New York, NY, USA, in November 2005. The 30 revised full papers and 20 revised short papers presented together with 18 poster papers were carefully reviewed and selected from 259 submissions. The papers are organized in topical sections on Web mining, Web information retrieval, metadata management, ontology and semantic Web, XML, Web service method, Web service structure, collaborative methodology, P2P, ubiquitous and mobile, document retrieval applications, Web services and e-commerce, recommendation and Web information extraction, P2P, grid and distributed management, and advanced issues. The presentation is rounded off by 14 industrial papers and the abstracts of 4 tutorial sessions.

Focused on actively using systematic review as method, this book provides clear, step-by-step advice on the logic and processes of systematic reviewing. Stressing the importance of precision and accuracy, this new edition carefully balances a need for insightful theory with real-world pragmatism; it introduces a wide range of cutting-edge approaches to research synthesis including text mining, living reviews and new ideas in mixed methods reviews such as qualitative comparative analysis. The book also includes: A new chapter on statistical synthesis Coverage of computer-assisted methods and relevant software Expanded sections on data extraction and management A guide to working with many different types of data including longitudinal and panel. Packed with examples from across the social sciences, this book helps students and researchers alike in turning systematic reviews into recommendations for policy and practice.

Addressing practical issues rarely covered in methods texts, this user-friendly, jargon-free book helps students and beginning researchers plan infant and child development studies and get them done. The author provides step-by-step guidance for getting involved in a developmental laboratory and crafting effective research questions and proposals. Tips on recruiting study participants cover access issues--such as how to overcome language and cultural barriers--and include helpful sample scripts. The book offers time management strategies, pointers for organizing and communicating data, and a roadmap of the journal publication process, complete with an annotated sample article. Numerous concrete examples, checklists, worksheets, and exercises are featured. Reproducible forms can be downloaded and printed in a convenient 8 1/2" x 11" size. Pedagogical Features *Chapter subheadings written as questions to help students quickly find the answers they need. *Key tips and checklists for managing each phase of a study. *Exercises that build core research skills. *Annotated sample journal article with commentary on the writing and publication process.

According to the American dream, hard work and a good education can lift people from poverty to success in the "land of opportunity." The unskilled immigrants who came to the United States from southern, central, and eastern Europe in the late 19th and early 20th centuries largely realized that vision. Within a few generations, their descendants rose to the middle class and beyond. But can today's unskilled immigrant arrivals—especially Mexicans, the nation's most numerous immigrant group—expect to achieve the same for their descendants? Social scientists disagree on this question, basing their arguments primarily on how well contemporary arrivals are faring. In Italians Then, Mexicans Now, Joel Perlmann uses the latest immigration data as well as 100 years of historical census data to compare the progress of unskilled immigrants and their American-born children both then and now. The crucial difference between the immigrant experience a hundred years ago and today is that relatively well-paid jobs were plentiful for workers with little education a hundred years ago, while today's immigrants arrive in an increasingly unequal America. Perlmann finds that while this change over time is real, its impact has not been as strong as many scholars have argued. In particular, these changes have not been great enough to force today's Mexican second generation into an inner-city "underclass." Perlmann emphasizes that high school dropout rates among second-generation Mexicans are alarmingly high, and are likely to have a strong impact on the group's well-being. Yet despite their high dropout rates, Mexican Americans earn at least as much as African Americans, and they fare better on social measures such as unwed childbearing and incarceration, which often lead to economic hardship. Perlmann concludes that inter-generational progress, though likely to be slower than it was for the European immigrants a century ago, is a reality, and could be enhanced if policy interventions are taken to boost high school graduation rates for Mexican children. Rich with historical data, Italians Then, Mexicans Now persuasively argues that today's Mexican immigrants are making slow but steady socio-economic progress and may one day reach parity with earlier immigrant groups who moved up into the heart of the American middle class. A mystical dialogue between a male author and his creation, this posthumous work has never before been translated, and is a book of particular beauty and strangeness. A mystical dialogue between a male author (a thinly disguised Clarice Lispector) and his/her creation, a woman named Angela, this posthumous work has never before been translated. Lispector did not even live to see it published. At her death, a mountain of fragments remained to be "structured" by Olga Borelli. These fragments form a dialogue between a god-like author who infuses the breath of life into his creation: the speaking, breathing, dying creation herself, Angela Pralini. The work's almost occult appeal arises from the perception that if Angela dies, Clarice will have to die as well. And she did.

Lispector at her most philosophically radical.

At last, a noir novel from the Argentine master of suspense and surprises Maxi, a middle-class, directionless ox of a young man who helps the trash pickers of Buenos Aires's shantytown, attracts the attention of a corrupt, trigger-happy policeman who will use anyone — including two innocent teenage girls — to break a drug ring that he believes is operating within the slum. A strange new drug, a brightly lit carousel of a slum, the kindness of strangers, gunplay... no matter how serious the subject matter, and despite Aira's "fascination with urban violence and the sinister underside of Latin American politics" (The Millions), Shantytown, like all of Aira's mesmerizing work, is filled with wonder and mad invention.

Research Methods for Education, Second Edition takes the student by the hand and guides them through the complex subject of research methods in an engaging, witty and clear way. The book covers the philosophical approaches and epistemology, as well as the practical aspects of research, such as designing questionnaires and presenting conclusions. Each chapter is split into 'Context' and 'Practice' and both sections are packed with exercises, examples and comparative international material from other educational contexts, Peter Newby's book is the student-friendly text which demystifies the research process with clarity and verve. Key features: -written in a clear and friendly manner to help students feel more confident dealing with the complexities of research and particularly useful for those new to research or less confident with numbers -a mixed methods approach, which doesn't simply prioritise quantitative or qualitative methods, allowing for greatest possible coverage contains guidance on analytic procedures that require more advanced tools such as SPSS and Minitab -many excellent international examples and case studies specifically from education, which breaks away from a parochial focus on UK education system.

Health Sciences Literature Review Made Easy, Fourth Edition is an essential text for your nursing research course and provides students with a solid foundation and the tools they need to evaluate articles and research effectively. The Fourth Edition builds on the digital updates made to the previous edition and highlights the Matrix Method and the skills necessary to critically evaluate articles. The text also covers Method Maps, which teach students how to effectively construct a research study. The author leads students through the process of how to manage a quality literature review in the context of evidence-based practice. A case study highlighting a typical graduate student is woven throughout the text to illustrate the importance of literature reviews and evidence-based practice. Health Sciences Literature Review Made Easy, Fourth Edition is appropriate for graduate level nursing courses as well as undergraduate Nursing Research courses that require literature reviews. Key Features: Data Visualization: A Digital Exploration is an interactive, online appendix The Matrix Method teaches the essential skills around literature evaluation A real-life scenario case study is woven throughout each chapter to reinforce key concepts Completely updated chapter on the guidelines for Methodological Review Method Maps are introduced to convey the thought process around designing a research study Online Bonus! Each text purchase includes access to an online supplement for students. The Fourth Edition features a cutting-edge, interactive appendix. This digital exploration of Data Visualization includes new content, podcasts from the author, and supplemental resources such as TED talks. This is a fantastic student resource! For more information visit go.jblearning.com/matrixmethod"

The definitive work in D&I research -- now completely updated and expanded The application of scientific research to the creation of evidence-based policies is a science unto itself -- and one that is never easy. Dissemination and implementation research (D&I) is the study of how scientific advances can be implemented into everyday life, and understanding how it works has never been more important for students and professionals across the scientific, academic, and governmental communities. Dissemination and Implementation Research in Health is a practical guide to making research more consequential, a collection assembled and written by today's leading D&I researchers. Readers of this book are taught to:  Evaluate the evidence base in an effective intervention  Choose a strategy that produces the greatest impact  Design an appropriate and effectual study  Track essential outcomes  Account for the barriers to uptake in communities, social service agencies, and health care facilities The challenges to moving research into practice are universal, and they're complicated by the current landscape's reliance on partnerships and multi-center research. In this light, Dissemination and Implementation Research in Health is nothing less than a roadmap to effecting change in the sciences. It will have broad utility to researchers and practitioners in epidemiology, biostatistics, behavioral science, economics, medicine, social work, psychology, and anthropology -- both today and in our slightly better future.

This book constitutes extended selected papers from the 15th Conference on Advanced Information Technologies for Management, AITM 2017, and the 12th Conference on Information Systems Management, ISM 2017, held as part of the Federated Conference on Computer Science and Information Systems, FedCSIS, which took place in Prague, Poland, in September 2017. The 13 papers presented in this volume were carefully reviewed and selected from 48 submissions. They were organized in topical sections named: information technology and systems for knowledge management; information technology and systems for business transformation; and implementation and evaluation of information systems.

Inspired by a dream, a retired publisher spontaneously embarks on a trip to the Dublin cemetery in which a character from Joyce's "Ulysses" was buried, where he meets a mysterious person who resembles Samuel Beckett.
